MAN COMES SEVENTY MILES TO BUY GROCERIES

John Lamberty, manager of Hamilton's grocery department, reports receiving a large order for groceries from a store 70 miles distant. The party made the trip with a team in two and a half days, driving through Philomath and Corvallis to do their trading in Albany. This store has purchased supplies from Hamilton's for over a year, finding the prices equally as good as the wholesale houses of Portland. At present some of the prices are even better as many articles are being sold for less than wholesale price.

Hamilton's have built up a good deal of distant business of this kind both wholesale and retail by extensive advertising and low prices.

Miss Flora Simon and Miss Vera Simon were in Albany for the day on Friday.

SAYS HOT WATER WASHES POISONS FROM THE LIVER

Everyone should drink hot water with phosphate in it, before breakfast.

To feel as fine as the proverbial fiddle, we must keep the liver washed clean, almost every morning, to prevent its sponge-like pores from clogging with indigestible material, sour bile and poisonous toxins, says a noted physician.

If you get headaches, it's your liver. If you catch cold easily, it's your liver. If you wake up with a bad taste, furred tongue, nasty breath or stomach becomes rancid, it's your liver. Sallow skin, muddy complexion, watery eyes all denote liver uncleanness. Your liver is the most important, also the most abused and neglected organ of the body. Few know its function or how to release the dammed-up body waste, bile and toxins. Most folks resort to violent calomel, which is a dangerous, salivating chemical which can only be used occasionally because it accumulates in the tissues, also attacks the bones.

Every man and woman, sick or well, should drink each morning before breakfast a glass of hot water with a teaspoonful of limestone phosphate in it, to wash from the liver and bowels the previous day's indigestible material, the poisons, sour bile and toxins; thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach.

Limestone phosphate does not restrict the diet like calomel, because it can not salivate, for it is harmless and you can eat anything afterwards. It is inexpensive and almost tasteless, and any pharmacist will sell you a quarter pound, which is sufficient for a demonstration of how hot water and limestone phosphate cleans, stimulates and freshens the liver, keeping you feeling fit day in and day out.
