HORTICULTURALIST SAYS APPLES LACK POLLINATION

W. A. Bodine, a local horticulturist, states that he has been asked to diagnose the reason for so many apples and pears falling off the trees of late. Mr. Bodine states that this is not the result of disease in most of the cases, but is the result of insufficient pollination. The blossoms were not well pollinated in the spring and as a result lack vitality. The hot, dry weather is too much for them and they drop soon from the trees. Mr. Bodine states that had the conditions been favorable, with plenty of moisture, the crop would have been better and not so many would have dropped.

He states that the apple and pear crops will be generally light, that the peach crop is practically a failure and that the pear crop will be fairly good.

"BACK WAGE PROGRAM"
URGES NAVAL OFFICER

By J. W. Pegler, United Press Staff Correspondent

With the American Flotilla in British Waters, July 10.—(By Mail)—"Take off the lid and show the people back home what a fierce fight we are up against."

Thus a highly-placed American naval officer, attached to the command of this destroyer squadron, endeavored to say something about a grave situation, without being able to say anything definite. The officers tell plenty—in confidence. The correspondents attached to the American destroyers know that ships have been destroyed by the U-boats in far greater tonnage than at present they can be produced. They know, also, something of the methods by which our destroyers are fighting the unseen menace and of the handicaps which are hampering the fight—handicaps which give the Germans the advantage and which the Americans back home could remove in a few months.

But the naval officer couldn't tell what he knew, for publication. And the correspondents are on their honor to submit all their work to the censorship.

"It would help the enemy if we should tell our people all they ought to know," the naval expert continued. "A frank statement of the whole submarine situation, with its bearing on the land campaigns, might be of considerable practical value to him. Perhaps it would also stimulate his sinking morale for a time—that depends on whether he is expecting a great deal or little from his submarine fight."

But I seriously question whether it would not eventually help us to win this fight. If the people could only know, they wouldn't for a minute hold back the support we need."

Though the censorship, with its evil tendency to shut the people's eyes to the peril, he maintained, the officer said ours need not become a losing fight. Under present conditions, he advised, the people back home can give best aid by backing the war program of the Army and Navy Departments without question, however grotesque they may seem.

"Just now there are a hundred important facts which would illuminate the public mind," he concluded. "As long as civilians can't know these things the best they can do is to trust the departments that really do know, to make the right decisions."

WHY FREQUENT TESTING OF THE BATTERY IS NECESSARY

"If a storage battery would make some noise," says Mr. Preston, the local Willard Service Man, "a groan, or a squeak, or a rattle like other parts of the machine do when they're out of order, it would be far better treated. When the car owner hears a squeak under the hood of his machine, or a rattle in the body he knows that there is something wrong and is not content until it has been corrected."

"It is entirely different with a battery. It is to the average motorist nothing more or less than a black box. As he cannot get into it, he is not very much interested in its internal working, and when anything goes wrong with it, there is no noise to warn him that all is not right."

"On this account it usually gets little attention. Perhaps the motorist thinks that because it is quiet it is all right and he is, on that account, apparently pained and shocked when some day it actually refuses to work for him."

"Even though the battery does not make a noise when it is not being well treated, there is one sure means of telling its condition and that is by testing it with a hydrometer syringe."

"Of course, the battery has to be filled regularly with distilled water and any car owner who knows the first elements of automobile and battery care will do this. It is a very simple little matter at this time for the owner to stick a hydrometer into his battery and get the specific gravity of it. The hydrometer reading is a sure index of the battery's condition."

"eW battery men realize that the hydrometer test is the only means which the car owner has of keeping track of the condition of this battery, that, where other parts of the machine will give some indication of the neglect or trouble, the battery keeps silent. That is why we Willard Service Station Men are offering to test any battery at any time."

"Experience has taught us that this is the most satisfactory all around for the car owner, because it does for him a thing that he might forget to do or even if he thought of it, neglect to do, for the battery manufacturer, because a battery that is neglected will not give good service and the manufacturer's product, therefore, gets a 'black eye,' to the car manufacturer, when an accessory of the machine goes wrong that owner usually blames the machine itself and not that accessory. Everyone is happier."

"Any car owner that is wise will take advantage of this free service that is offered. Battery tests tell a more eloquent story about the battery than squeaks or rattles do about the rest of the machinery of the machine."

Filed Suit On Note—
Wm. Gothehell this morning filed suit against Geo. Campbell, et al, on a promissory note that was given the 26th of July, 1911, for \$100. The plaintiff asks judgment for \$100, the face of the note, interest at 10 per cent, and \$10 attorney fees.

Married Yesterday Afternoon—
A marriage license was issued yesterday afternoon to Wm. Chester Sickels and Grace Bond, both of Harrisburg. They were married later in the afternoon by Rev. Chas. E. Gibson at the Methodist parsonage.

Autos Collide—
Two autos, one belonging to Henry Obermyer and the other to out-of-town people, collided at Third and Broadalbin streets yesterday afternoon. No great damage was done to either car.

RISE, RISE, AMERICA

Rise, rise America and gird yourself for war.
The call to arms has sounded; take your station at the fore.
Our cause is just and vandals must be swept from land and sea;
Uphold the right, be bold and fight for God and Liberty.
Rise, rise, America and battle for the Lord.
The end of kings and royal rings is written on your sword;
From Belgium to Jerusalem the stricken nations pray
For succor and deliverance—go save them while you may.
Rise, rise America and strike the mighty blow
That breaks the thrall of tyranny and brings the despot low.
The world is on the Cross and Justice bids you gird for war;
Rise, rise America and hasten to the fore.

EAT LESS AND TAKE SALTS FOR KIDNEYS

Take a glass of Salts before breakfast
if your back hurts or bladder
bothers you.

The American men and women must guard constantly against kidney trouble, because we eat too much and all our food is rich. Our blood is filled with uric acid which the kidneys strive to filter out, they weaken from overwork, become sluggish; the eliminative tissues clog and the result is kidney trouble, bladder weakness and a general decline in health.

When your kidneys feel like lumps of lead; your back hurts or the urine is cloudy, full of sediment or you are obliged to seek relief two or three times during the night; if you suffer with sick headache or dizzy, nervous spells, acid stomach, or you have rheumatism when the weather is bad, get from your pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate clogged kidneys; to neutralize the acids in the urine so it no longer is a source of irritation, thus ending bladder disorders.

Jad Salts is inexpensive; cannot injure, makes a delightful effervescent lithia-water beverage, and belongs in every home, because nobody can make a mistake by having a good kidney flushing any time.

CHICHESTER'S PILLS
THE DIAMOND BRAND
Ladies! Ask your Druggist for Chichester's Diamond Brand Pills in Red and Gold wrapper, sealed with Blue Ribbon. Take one either before or after meals. Ask for CHICHESTER'S PILLS, the Diamond Brand. Sold by Druggists Everywhere.

Electric
Ranges
Are
Clean
Safe
Reliable

"When I get back My Dinner
will be ready to serve"

An Electric Range Is a Thing of Beauty

Something every woman admires and wants in her kitchen but not for beauty alone.

Because electric ranges employ no open flame for heat—they are clean and safe.

Because they are clean they are sanitary

Because they are not subject to the whims of dampers and drafts and flues they are reliable.

More than all else—modern housewives prefer and use electric ranges because they are economical and produce superior results with less trouble. Ask about the new cooking and heating rate—and decide to take advantage of the low price time payment offer before it expires.
