Advertising Momentum

Many institutions expect advertising to perform miracles, to rehabilitate a depleted list of customers in a few weeks or harvest a golden crop of dollars. Advertising is not based on wizardry any more than on quackery. Its results are cumulative.

There are no miracles in advertising, but money so invested, if invested properly and the opportunities thus created properly followed, will yield handsome returns.

An inquiry from a prospect who has never transacted business with your organization is the most vital and the most potent factor in the success of your business. That inquiry represents growth, development new business, —and new inquiries are worth attention, study and care—the full measure of your service. The aggressive and consistent advertiser whose educational publicity attracts, will find that the business has acquired a new momentum, the effect of which will be apparent in succeeding years.

Over There and Over Here

Over there on the fighting front, and behind the lines, the telephone is as indispensable as it is here at home. Over there troops are moved and battles fought, the movements of the enemy reported and the supplies and munitions brought up by means of telephone communication.

Over here more than 12,000 long-line operators have been specially trained for Government service, and the Government at Washington keeps in close touch with every phase of war preparation and directs the work of a vast number of industries upon which the success of our armies will depend.

Over there and over here the great war captains and the captains of industry depend upon telephone communication to carry out their plans successfully.

The Bell System is devoting all its great resources to the end that the work of preparing our armies for battle and of sustaining them in the field, shall go on systematically and efficiently so that over here and over there, there may be coordinated and sustained effort which alone will bring the final victory.

Exercise That Rests the Mind.

Perhaps the best way to rest your thought mechanism is to indulge in muscular exercise, by which means you concentrate your anatomical movements and indirectly rest your mind. To focus the attention upon muscular movements or upon some phase of physical activity is to relax the muscles which are concerned in the generation of thought and ideas. Relaxation is a better word for some sorts of rest.

ELECTRICITY America's Ally

Have you stopped to think what Electricity means to America in this war?

It turns the wheels of nearly a million factories; lights ten million homes, brings ease and comfort into the daily lives of a hundred million people. In the pursuits of peace it is man's ally; but when war appears it becomes a veritable brother to Mars.

In helping to carry on the great war the Electric industry is "doing its bit." Tireless, day in and day out, the Electrical men of this nation are marshaling the forces of heat, light and power for your greater efficiency and benefit.

We are doing our utmost to cut out waste and make our service as efficient as possible for your use and the nation's.

Whatever your part in this great cause, remember your own personal responsibility. Remember Electricity. Make the best use of this greatest of all helps.
