trucks now in use

MAXWELL TRUCK

99.6% is a figure that no vehicle of the day has surpassed.

It is based on what the 6600 Maxwell trucks have done.

Think what it means—6600 trucks all identically alike (except the bodies) travelling over every known kind of road in and about 500 cities, used in every climate where the American flag flies, every altitude, and driven by 6600 different drivers—who have 6600 different ideas on how to drive a truck.

And yet of all this number the service records show 99.6% perfect.

Quantity production has brought the price down within the reach of everyone—\$400 less than any other truck of similar capacity in the world.
