A favorite story is being peddled that sweaters which are knit for soldiers are being sold by merchants in various parts of the state.

It's a lie. Go out and prove it by trying to buy one, or by trying to find the fellow who sold one, or the fellow who bought one.

Shark Leather Here.

From being an implacable enemy to man science is making the shark expiate its crimes by helping to reduce the high cost of living. For the tiger of the sea has now become a source of leather to clothe millions of pairs of feet.

Experiments with shark leather indicate that it may be used for practically everything now made of cattle leather. It is even claimed that shark hides have one great advantage over cowhides in that the "splits" are amazingly strong. A "split" is simply a peeling of the hide—something like the veneer cut from a slab of wood.

A movement is on in Oregon to make every day a speechless day so far as idle gossip is concerned.

Great harm is being done by the American people who talk too much.

JUDGE KELLY ENDORSED BY SALEM STATESMAN

The Sunday Statesman, of Salem, prints a picture of Judge P. R. Kelly, candidate for Supreme Justice, and in part, the writer has the following to say about him:

"Judge Kelly's friends in the legal profession have petitioned him to become a candidate in the May primaries for nomination for Supreme Justice and he has consented. In the seven years he has been on the Circuit bench, he has given universal satisfaction. Marion and Linn counties will part with Judge Kelly with regret, his nomination being practically assured for there seems to be no opposition. What is the district's loss, however, is the state's gain, for he will bring to the office experience at the bar and on the bench; a trained mind and a capacity to work."

The Neglected Stenographer.

A typewriter company sends in a leaflet advertising complete office outfits. One of these consists of five pieces—a pencil sharpener, a check protector, a cash box, a cuspidor and an ash-tray with match-box attached. It's rather a surprising combination when you come to think of it.

And if a cuspidor and an ash-tray are considered essential factors in the business of conducting an office, what about a powder box and a rack for chewing gum?

It is true that sleeve protectors are included in another outfit, which comprises paste, rubber bands, a dater, a seat-cover and a wire paper rack, but we still feel that the fair sex has been neglected. There's neither a mirror nor a knitting stand in one of them.

The food administrator says we ate 88.3 pounds of sugar apiece last year. There's one thing sure—that's more than we'll eat this year.

CHINA LOSING TRADE IN TEA

General Opinion That Scientific Cultivation of the Plant Has Begun Too Late.

China's tea trade is not keeping pace with the world's consumption of tea. Scientific cultivation instead of old-time methods and the use of machinery are being used in the effort to regain the lost commercial ground. The ministry of agriculture has established a model farm, and the first tea grown on it was sent to market this year. It is said to have been of good quality, but no details are yet available of the equipment and methods employed. Foreign tea men seem to have little faith in the results of this attempted reform and consider it unlikely that Chinese teas will ever regain the leading place in the markets of the world. It is said that Chinese teas have less tannin than other teas, and that the finer grades are unsurpassed in delicacy of flavor; but the average tea drinker seems to find the teas of India and Ceylon satisfactory.

The Oregon division on Public Information about the war has issued a statement in which it asks the people to be careful about whom they talk to at any time. Germany has a lot of spies in Oregon who are eagerly picking up any sort of information. Therefore, if you know anything keep it to yourself, or tell it directly to a representative of the government.

Our enemies are listening all the time. Don't talk.

Advertising Momentum

Many institutions expect advertising to perform miracles, to rehabilitate a depleted list of customers in a few weeks or harvest a golden crop of dollars. Advertising is not based on wizardry any more than on quackery. Its results are cumulative.

There are no miracles in advertising, but money so invested, if invested properly and the opportunities thus created properly followed, will yield handsome returns.

An inquiry from a prospect who has never transacted business with your organization is the most vital and the most potent factor in the success of your business. That inquiry represents growth, development new business, —and new inquiries are worth attention, study and care—the full measure of your service. The aggressive and consistent advertiser whose educational publicity attracts, will find that the business has acquired a new momentum, the effect of which will be apparent in succeeding years.
