Thought He Was "Setting 'Em Up."

A young Topeka army officer, now in France, was seized while in Paris with a desire to send his sister a present, and finally decided on a waist, says the Kansas City Star. He entered a fashionable shop, and selected a waist, but not knowing the size his sister required, singled out a pretty Parisian clerk who looked about his sister's size, and asked her to try the waist on. When she returned the fit was pronounced perfect, and the young officer nodded approvingly and paid the cashier. As he turned back to claim the article, the clerk flew into his arms and kissed him again and again, exclaiming, "Thank you, thank you." All the other clerks in the store then caught the idea that the handsome young American was "setting them up" generally to girls who wanted new waists, and begged him to buy for them also. The officer finally excused a retreat in some manner or other, but the sister in Topeka has not yet received any present.

SALTS IS FINE FOR KIDNEYS, QUIT MEAT

Flush the Kidneys at once when Back hurts or Bladder bothers—Meat forms uric acid.

No man or woman who eats meat regularly can make a mistake by flushing the kidneys occasionally, says a well-known authority. Meat forms uric acid which clogs the kidney pores so they sluggishly filter or strain only part of the waste and poisons from the blood, then you get sick. Nearly all rheumatism, headache, liver trouble, nervousness, constipation, dizziness, sleeplessness, bladder disorders come from sluggish kidneys.

The moment you feel a dull ache in the kidneys or your back hurts, or if the urine is cloudy, offensive, full of sediment, irregular of passage or attended by a sensation of scalding, get about four ounces of Jad Salts from any reliable pharmacy and take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia and has been used for generations to flush clogged kidneys and stimulate them to activity, also to neutralize the acids in urine so it no longer causes irritation, thus ending bladder disorders. Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink which all regular meat eaters should take now and then to keep the kidneys clean and the blood pure, thereby avoiding serious kidney complications.

Peanuts Up a Peg.

Until recently the peanut was regarded as a casual—one might almost say sportive—article of provender. It has been looked upon as appropriate to the small boy and the circus. The "peanut gallery," though but a memory to the present generation, is a not-forgotten term for the cheap seats at the top of a theater.

But now it is different. The long-despised peanut is coming into its own. It has the emphatic endorsement of Mr. Hoover. Our people are advised to eat peanuts.

You see, the peanut is not a nut at all, properly speaking. It is a kind of pea; and, like other legumes, it is rich in tissue-making stuff. A paper bag of peanuts (even nowadays, when somewhat reduced in size) affords a fairly square meal.

The peanut, however, may be utilized to advantage in cooking—for soup, for "peanut loaf," and in other ways. If you want the recipes, you can get them from the food administration at Washington.
