

Uncle Sam will Hand Him Real GRAVELY Chewing Plug In a Pouch from You

The U. S. Mails will reach any man in Uncle Sam's Service. When you send him tobacco, let it be good tobacco—tobacco worth sending all that long way—the flat, compressed plug of Real Gravelly.

Give any man a chew of Real Gravelly Plug, and he will tell you that's the kind to send. Send the best! Ordinary plug is false economy. It costs less per week to chew Real Gravelly, because a small chew of it lasts a long while.

If you smoke a pipe, slice Gravelly with your knife and add a little to your smoking tobacco. It will give flavor—improve your smoke.

SEND YOUR FRIEND IN THE U. S. SERVICE
A POUCH OF GRAVELLY

Dealers all around here carry it in 10c pouches. A 3c stamp will put it into his hands in any Training Camp or Support of the U. S. A. Even "over there" a 3c stamp will take it to him. Your dealer will supply envelope and give you official directions how to address it.

P. B. GRAVELLY TOBACCO COMPANY, Danville, Va.

The Patent Pouch keeps it Fresh and Clean and Good.

CHAPLIN AT THE ROLFE THEATER

A Night Out Will Be Added Attraction With "Maternal Spark"

An added attraction to the regular showing for Wednesday and Thursday will be a Chaplin comedy, "A Night Out," which will be shown in connection with the regular show.

Attention, Home Guard—

Home Guard members are requested to assemble at the armory Thursday morning promptly at 9:30 o'clock.

W. G. BALLACK, captain.
G. E. SANDERS, 1st sgt.

tion with the regular show.

"The Maternal Spark," the latest Triangle five-act release, also appears on the bill.

This is a gripping story of real life with a society vampire, a young man whose head was turned by too quick success and a sweet little wife of the old school.

Rowland Lee, who was cast as leading man, was notified that he was needed by Uncle Sam shortly after the picture was begun. A wire to the officers' training camp at Plattburg, N. Y., where he had been ordered to report, won a short leave. The entire company worked with a will, both

night and day, so that Lee might report to Plattburg with as little delay as possible.

Lee, who is now in training in the East, will have the opportunity of seeing himself in his last role before being cast for the greatest role in his life, that of a U. S. officer. This time, however, there will be no camera man to register joy, sorrow and anguish.

FEW FOLKS HAVE GRAY HAIR NOW

Druggist Says Ladies are Using
Recipe of Sage Tea and Sulphur.

Hair that loses its color and lustre, or when it fades, turns gray, dull and lifeless, is caused by a lack of sulphur in the hair. Our grandmother made up a mixture of Sage Tea and Sulphur to keep her locks dark and beautiful, and thousands of women and men who value that even color, that beautiful dark shade of hair which is so attractive, use only this old-time recipe. Nowadays we get this famous mixture improved by the addition of other ingredients by asking at any drug store for a bottle of "Wyeth's Sage and Sulphur Compound," which darkens the hair so naturally, so evenly, that nobody can possibly tell it has been applied. You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time. By morning the gray hair disappears, but what delights the ladies with Wyeth's Sage and Sulphur Compound is that, besides beautifully darkening the hair after a few applications, it also brings back the gloss and lustre and gives it an appearance of abundance. Wyeth's Sage and Sulphur Compound is a delightful toilet requisite to impart color and a youthful appearance to the hair. It is not intended for the cure, mitigation or prevention of disease.

RED CROSS BARN DANCE

This is what the Red Cross Ladies Have finally decided to do:
Is to give a Jitney Barn Dance;
The invitation is extended to you.

That great big barn on Anderson's farm
Just eight miles southeast of town,
On Friday night, May thirty-first,
Folks will be there for miles around.

Be sure and come and "bring your mon"
You better limber up your feet;
We are going to give you good music
And a floor that can't be beat.

You don't mind spending a nickle or two,
Or, suppose that you give us a dollar,
As long as it goes for such a good cause,
I am sure that no one will holler.

If you like you can come at 8 o'clock,
We don't mind if you stay until 2.
Or else you can come and dance all night.
A good time is what we'll try to show you.

Three Seasons in Year.

The Egyptian year was divided into three seasons. These were Shait, the season of waters, being the time occupied by the rising spread and recession of the Nile; First, the season of vegetation; the Shonnu, the season of harvest. These seasons are supposed to have been arranged by the god Thot. Each season was divided into four months and they were known in official documents by numbers only. Thus we have the first, second, third and fourth months of Shait, the months of each of the other seasons being designated in the same manner. Each month, however, had a patron god and the people ordinarily gave to it, in their daily intercourse, the name of its god. These deity names of the months were transcribed into Greek, then into Arabic and are now largely used by the Christian inhabitants of Egypt in preference to the Mussulman appellations.

Faith.

We had a new experience the other day when we picked up two bottlers of survivors from the —, torpedoed without warning. I will say they were pretty glad to see us when we bore down on them. As we neared, they began to paddle frantically, as though fearful we should be snatched away from them at the last moment. The crew were mostly Arabs and Lascars, and the first mate, a typical comic-magazine Irishman, delivered himself of the following: "Sure, toward the last, some o' thim haythens gits down on their knees and starts calling on Allah; but I sez, sez I: 'Git up afore I swat ye wid the ax-handle, ye beighted haythens; sure if this boat gits saved 't will be the Holy Virgin does it or none at all, at all! Git up,' sez I."—An American Officer, in the Atlantic.

To Unify Work.

That the whole of the Gilbert group of islands in the South seas should be given over to the care of the American board of commissioners for foreign missions was decided at a meeting of the London missionary board, held some little time ago. The American board had long been anxious for this arrangement, which unifies the work there, and offered to pay \$27,000, with which sum and the contributions of the islanders, all expenses of the staffing of the Northern Islands can be met for ten years. The group is under British government, and in 16 years of vigorous work in the Southern Islands, a strong church has been built up, and many able native pastors have been and are being trained.

COMING EVENTS

Cash Values Worth While **HAMILTONS'** at Everybody's Store

MASTERPIECE OF PHOTO- DRAMATIC ART AT CORT

When the man who wrote this story went to the Cort theatre last night to write a review of "Joan the Woman," he went there with the firm intention to stay ten minutes—just long enough to get an idea what it was all about and then intended to go home and have a good night's rest.

"What's the use," he said to himself. "I have seen so many moving pictures—they are all wonderful and magnificent, but I am tired tonight and not in the mood to see any pictures."

He asked the manager of the theatre for some printed matter so that he could write an intelligent report.

"No, sir," said the manager, "I'm not going to give you any matter. I want you to stay through the entire picture. If you don't I'll never speak to you again, and if you do and say you are not glad you stayed, I am going to buy you and your wife the best dinner in the city."

As a matter of fact, he not only liked the picture, but he was amazed by it. At the Globe tonight and tomorrow.

Oriental Rubies.

The Oriental ruby consists of nearly pure alumina—i. e., oxide of aluminum—in a crystalline form, containing but 1 per cent of oxide of iron and 1/2 per cent of any other substance. The specific gravity of this precious stone is higher than that of many other gems, ranging from 3.9 to 4.2. Aluminum, the metal, has, when cast, a density of 2.56; when forged, of 2.67, or only one-third of that of forged steel or a fourth of that of silver. The melting point is about 1,300 degrees Fahrenheit.

Advertising Momentum

Many institutions expect advertising to perform miracles, to rehabilitate a depleted list of customers in a few weeks or harvest a golden crop of dollars. Advertising is not based on wizardry any more than on quackery. Its results are cumulative.

There are no miracles in advertising, but money so invested, if invested properly and the opportunities thus created properly followed, will yield handsome returns.

An inquiry from a prospect who has never transacted business with your organization is the most vital and the most potent factor in the success of your business. That inquiry represents growth, development, new business, —and new inquiries are worth attention, study and care—the full measure of your service. The aggressive and consistent advertiser whose educational publicity attracts, will find that the business has acquired a new momentum, the effect of which will be apparent in succeeding years.
