DRUGS EXCITE YOUR KIDNEYS, USE SALTS

If your Back is aching or Bladder bothers, drink lots of water and eat less meat.

When your kidneys hurt and your back feels sore, don't get scared and proceed to load your stomach with a lot of drugs that excite the kidneys and irritate the entire urinary tract. Keep your kidneys clean like you keep your bowels clean, by flushing them with a mild, harmless salt which removes the body's urinous waste and stimulates them to their normal activity. The function of the kidneys is to filter the blood. In 24 hours they strain from it 400 grains of acid and waste, so we can readily understand the vital importance of keeping the kidneys active.

Drink lots of water—you can't drink too much; also get from any pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning for a few days and your kidneys will act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate clogged kidneys; also to neutralize the acids in urine so it no longer is a source of irritation, thus ending bladder weakness.

Jad Salts is inexpensive; cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep their kidneys clean and active. Try this, also keep up the water drinking, and no doubt you will wonder what became of your kidney trouble and backache.

This Electric Range Will Save Coal for Uncle Sam and Time and Labor for You

Careful tests have shown that 262.7 pounds of coal are required by a central station to supply a family with cooking current equivalent to 800 pounds of coal consumed in a solid fuel range. An electric range will do your cooking better and save on your food bill. The elimination of the fuel and ash problem saves a world of time and labor. Arrange to install an electric range in your home today.

Back of the Firing Line

Modern war conditions demand that our armies must have behind them national solidarity, the coordination of all the vast activities and an industrial army many times greater than the Nation's fighting forces.

The Nation's capital is linked with all these varied activities by the toll and long distance lines of the Bell System. Thousands of miles of special wire systems have been turned over to the Government for its exclusive use. Switchboards in the Government departments at Washington have been enlarged and new ones installed. Right of way is given to Government business over all commercial lines, so that the Government chiefs may keep in constant touch with every phase of the Nation's great task and direct its progress intelligently and effectively.

In organizing the military activities of the country, the Government has had the effective cooperation of the Bell Telephone System, which even in peace times reached 70,000 communities and now extends to the headquarters of every Army Department and Naval District in the United States.
