THE VICE OF LOAFING

"We have known our share of drunkards and dope fiends," confesses the Saturday Evening Post. "We have seen those who seemed fairly hopeless shake off their vice and emerge useful, honor-worthy men. According to our observation, however, a man once really sunk in the vice of laziness seldom gets out—but remains the nearest to absolute zero in human character."

It comes with somewhat of a shock, this view that laziness is worse than drink or dope; but when you think it over, isn't the Post right about it?

The drunkard or dope fiend may, even while under the handicap of his harmful indulgence, accomplish a good deal of useful work and make himself an asset to the community. The loafer is of no use to himself or anybody else. He cumber the earth. He is a parasite on society, no matter whether he does his loafing as a dirty bum or an elegant clubman. And the vice, if long indulged, really does become incurable.

This philosophizing is inspired by the laws passed against habitual idlers in several states. They are regarded by some people who are not themselves in the proscribed class as an unwarranted interference with personal liberty. Not so, says the Post. There ought to be danger signals warning men against idleness. Those who will not heed moral advice should be controlled. "We believe society has a right and duty to say to every able-bodied man, 'Work or you shall not eat.'"

The war has made us see this, along with many other truths to which we formerly shut our eyes.
