# Flood's Store

334 West First St.

## FOOT-SHAPING SHOES FOR YOUNGSTERS

The necessity of proper shoes for growing feet cannot be too strongly emphasized. Starting with the first broadtoed heeled shoes for little tots, the shape and heel height should be gradually changed as they grow older, that they may never know the torture of any foot ailment. Our Shoes for Children are scientifically constructed to meet the special requirements of every age, and their Sturdiness means a considerable saving in Shoe Bills.

- White Canvas low shoes, 1 to 5 ..... \$1.65
  - White Canvas high shoes, 1 to 5 ..... \$1.75
  - White Canvas High Shoes, 5 to 8 ..... \$2.00
  - White Canvas tan Shoes, 5 to 8 ..... \$1.85
- In Leather, Kid or Patent ..... slightly more

## COL. DISQUE SAYS WAR WILL BE WON WITH AIRCRAFT

### Supremacy Overwhelming Is Necessary to Blind Teuton Armies

## DISQUE DESCRIBES JOB

Biggest Trick Ever Tackled by Yanks. He Thinks: People Are Equal to Great Emergency

PORTLAND, July 25.—Col. Bryce P. Disque of the U. S. Signal corps is confident that when the United States has produced DeHaviland airplanes in sufficient quantities we will obtain "such a supremacy over our enemies as to insure a prompt termination of the war."

This opinion is expressed in the leading article of the Monthly Bulletin of the Royal Legion of Loggers and Lumbermen off the press today. In it the colonel tells of a flight he made in such a machine at the Wright flying field at Dayton, Ohio. "I am confident we are on the road to such production," continued Col. Disque, "but that it will continue to be the most difficult problem that the American people have ever had to face and it will require long and hard work on the part of everybody to produce the essential parts of these machines before we can provide them in such

quantities as to completely overwhelm the German armies."

The type of machine in which the commander of the spruce division flew costs with its delicate equipment in the neighborhood of \$20,000.

Describing a flight through the clouds, Col. Disque says:

"The speed of the machine was terrific, probably the greatest ever obtained by an airplane in this country or abroad, and the power of the motor was such that passing through dense clouds gave us practically no change in conditions, the only effect being a slight jar, which with a less powerful motor would have been a severe jolt."

Disque described the engine as a Liberty motor generating something over 400 horsepower. He said he went to the Dayton-Wright airplane factory primarily for the purpose of looking into the manner in which they are utilizing the material which the spruce division has been supplying them.

"I found that they are using every inch of it to the best advantage and are constructing airplanes in quantities which are highly satisfactory and a credit to American initiative and resource," he says.

## FOUR YEARS OF IT

A peevish, fretful, lean old man Went mad four years ago; He gave the word—a war began; One's friend became one's foe.

The ancient dotard passed away Long since, of rage and fright; And many millions, since that day, Have marched into the Night.

Still, there be some who see these things, And wish to fight until They vindicate the right of kings To work their royal will!

The Teuton and poison Turk Starve, suffer, fight right well, To turn the world into a muck Of military hell.

O Satan, take your slavish Hun, And take his masters too; They sicken under God's bright sun, And long for home and you!

## 52 Draft Men Sent

KELSO, July 25.—Cowlitz county will send 52 draft men to Camp Lewis this week. This is the largest contingent yet supplied by this county.

TACOMA, July 25.—Lawyers of Washington who attended the annual convention of the State Bar here today got a firsthand view of war activities when they were taken through Camp Lewis.

Later during their stay here they will see a ship launching. The convention met in the United States district court in the federal building.

## Bank Responsible for Error.

An interesting decision has been made by the Missouri court of appeals, relative to holding the sender of a telegram responsible for a mistake in transmission. A Wyoming bank telegraphed a brokerage house, offering a carload of potatoes at \$1.35 a hundred pounds. The telegraph company's mistake in transmission made the price 35 cents a hundred. The supposed offer was accepted by the brokers and the potatoes were shipped. When payment was tendered at the rate of 35 cents a hundred the Wyoming bank refused to accept the money and brought suit for the full amount. The Missouri court of appeals ruled that the bank had made the telegraph company its agent in forwarding the telegram and that as the brokerage house acted in good faith it could not be compelled to pay more than the amount quoted in the message.

## State Protects War Gardens.

The supreme judicial court of Massachusetts held, in the case of Commonwealth vs. Gallata, that where a landlord terminated a tenancy at will of city lots, the tenant was entitled to growing crops as against the landlord and a subsequent lessee with knowledge of the first tenancy.

The court said: "The general principle is that where a person is in possession of land under a title that may be determined by an uncertain event not within his control, it is essential to the interests of agriculture that such a termination of his lease shall not prevent him reaping what he has sown and we see no reason why a tenant should be denied the right to emblements by the act of the landlord where the crop is raised on a city lot rather than on a farm."

## WHO'S HEADIN' SOUTH?

### "ATTACKED BY HUNS" SAYS MESSENGER BY PIGEON

LONDON, July 25.—A message by pigeon is the last word American navy officials here have of Ensign G. T. Rowe, American naval aviator, missing since May 30.

The message signed by Rowe read: "On the water. Attacked by three Huns."

Rowe and a British aviator were patrolling off the Dutch coast when the former was forced to descend for repairs. The British aviator had turned homewards when he heard shots and discovered that three German planes had attacked Rowe's machine. He returned to the spot where Rowe had descended but was unable to find any trace of the Yankee.

The British flyer was forced to give up search when he discovered six German destroyers in the vicinity. It is believed Rowe was taken prisoner.

## BOYS SPEND VACATION TRAINING FOR SEA

NEW LONDON, Conn., July 25.—Seven hundred boys from all parts of the United States are giving their vacation to their country at Camp Dewey—national training camp of the Junior Naval Reserves.

The boys are under draft age and most are in training for service in the merchant marine. Uncle Sam needs trained young men for this service and the shipping board has promised to accept two boys from the Junior Reserve for each new ship, paying them \$40 a month and maintenance, with 50 per cent bonus while in the war zone.

W. J. Phisic, commandant of Camp Dewey, was drillmaster for Col. Roosevelt's Rough Riders in 1898.

## Advertising Momentum

Many institutions expect advertising to perform miracles, to rehabilitate a depleted list of customers in a few weeks or harvest a golden crop of dollars. Advertising is not based on wizardry any more than on quackery. Its results are cumulative.

There are no miracles in advertising, but money so invested, if invested properly and the opportunities thus created properly followed, will yield handsome returns.

An inquiry from a prospect who has never transacted business with your organization is the most vital and the most potent factor in the success of your business. That inquiry represents growth, development, new business, —and new inquiries are worth attention, study and care—the full measure of your service. The aggressive and consistent advertiser whose educational publicity attracts, will find that the business has acquired a new momentum, the effect of which will be apparent in succeeding years.
