guns and the weight kept it down.

"Heinie had an exceptionally good plane, and I saw him directly above me several times. But he didn't shoot—that is, with his gun. I saw him take a picture of me with his camera, and finally he went off while I tried to get position close enough to shoot."

"Next morning I again borrowed a machine and went after him, with two guns. He was there, taking pictures. We began maneuvering for position and finally I got it and let him have it. Then one gun jammed. Before I could get a bead on him with

HAVE ROSY CHEEKS AND FEEL FRESH AS A DAISY—TRY THIS!

Says glass of hot water with phosphate before breakfast washes out poisons.

To see the tinge of healthy bloom in your face, to see your skin get clearer and clearer, to wake up without a headache, backache, coated tongue or a nasty breath, in fact to feel your best, day in and day out, just try inside-bathing every morning for one week.

Before breakfast each day, drink a glass of real hot water with a teaspoonful of limestone phosphate in it as a harmless means of washing from the stomach, liver, kidneys and bowels the previous day's indigestible waste, sour bile and toxins; thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach. The action of hot water and limestone phosphate on an empty stomach is wonderfully invigorating. It cleans out all the sour fermentations, gases and acidity and gives one a splendid appetite for breakfast.

A quarter pound of limestone phosphate will cost very little at the drug store but is sufficient to demonstrate that just as soap and hot water cleanses, sweetens and freshens the skin, so hot water and limestone phosphate act on the blood and internal organs. Those who are subject to constipation, bilious attacks, acid stomach, rheumatic twinges, also those whose skin is sallow and complexion pallid, are assured that one week of inside-bathing will have them both looking and feeling better in every way.

Long Life

Because its Sleeve Valves travel on a film of oil—Nature's best ball bearings

WHY is the Knight motor principle standardized by the London Omnibus Company? Why by the New York Transportation Company?

Why used almost exclusively in armored Tanks in the war? Principally because of consistency and long life.

Consistency, because there are no valves to rinker with.

Long life, because the sleeves, sliding one within the other, are

thoroughly protected by an oil coating.

The surfaces of the sleeves are always covered by a film of oil. Oil is a composite of countless round molecules!

Therefore the operation of the sleeves of the Willys-Knight self-preserving motor is comparable to running on ball bearings.

It is the only type of motor that improves with use.

the other he was letting me have it. I wrilled and came back at him still higher.

"Finally both our guns jammed and both of us knew the other couldn't shoot, though we tried to repair the guns. But no luck. So we wobbled each other goodbye with our flappers and both departed. Next day I was sent away for a few days and the boys said Heinie No. 16 wasn't there either. Some day we'll settle it and a lot of bets that were placed on us by the mechanics."
