THROWS POLLEN OVER BEES

Nature's Use of the Mountain Laurel Is One of Her Many Remarkable Devices.

Flop! and away go the little stamens of the mountain laurel and throw pollen over the bee which alights upon them. The naturalist sees here one of the most remarkable devices in all nature for compelling an insect to carry pollen. The lover of nature sees in the mountain laurel one of the most beautiful of the common woodland flowers, says Edward Bicklow in "Boys' Life."

The corolla is saucer-shaped, with ten little pits near the edge, and lightly caught in each of these little pits is the anther at the end of the elastic filament. This natural thing seems to grow in an unnatural manner, but do you know of any other plant that actually grows in distorted or strained position, or puts its own self in an uncomfortable and strained position from which it is glad to be released when the first insect comes along and sets it loose?

Upbuilds Chinese Army.
Ken Wang, twelfth graduate in the 1919 class at West Point academy, a year ahead of time, announced that he will return to China to take part in the rebuilding of its new army.

Ken Wang was selected to come to America to be educated in the best military academy in the world expressly for the part he is to play in bringing military coherence into Chinese army affairs.

Discouraged.
"T've given up trying to keep a mixed girl."
"What's the matter?"
"T've come to the conclusion that when it comes to paying wages I can't compete with a munitions factory."

Heat Sufferer.
"Suffer much from the heat?"
"I should say so. Nearly had a sunstroke rushing around to lay in next winter's coal."

FISH-SKIN SHOES COMING?

Quite Possible, Though It Must Be Admitted They Are Not Altogether Desirable Footwear.

When things come to the worst every day is going to be like Friday—the atmosphere will be crowded with the aroma of fish. There is a scarcity of leather, as everybody knows, and, that being so, tanners are making a diligent search for other substitutes, and new sources of supply. Experts declare that the skins of aquatic creatures offer a practically undeveloped resource, and it is not unlikely that before long we shall be covering our extremities with the skins of the man-eating shark and the sacred codfish. The reason such skins have not heretofore been utilized for leather is not because they are not perfectly well adapted for such use, but only because the skins of land animals have been so plentiful. Disciples of Frank Walton dispute the experts about the curing of fishskins. They say once a fish always a fish. If it comes to pass that we adopt fish-skin shoes these fishermen offer some advice to the fellow youth who goes courting. "Leave your fish-skin shoes on the front porch, like the Hollanders and Japs, and court in your stocking feet. Otherwise there will be a chilly reception awaiting you." Being married, they are talking by the book.

Callouses

Pain There

are signs of a weak and transverse arch. One of more of the little bones across the ball of the foot are displaced, causing uneven pressure. The sole of the foot burns, great and little toe joints enlarge and a cramplike pain known as Morton's Toe develops. This condition, as well as corns, bunions, broken-down arches, weak ankles and all forms of foot trouble is quickly relieved and the cause permanently corrected by the use of

PUT CREAM IN NOSE AND STOP CATARRH

Tells How To Open Clogged Nostrils and End Head-Colds.

You feel fine in a few moments. Your cold in head or catarrh will be gone. Your clogged nostrils will open. The air passages of your head will clear and you can breathe freely. No more dullness, headache; no hawking, snuffling, mucous discharges or dryness; no struggling for breath at night.
Tell your druggist you want a small bottle of Ely's Cream Balm. Apply a little of this fragrant, antiseptic cream in your nostrils, let it penetrate through every air passage of the head; soothe and heal the swollen, inflamed mucous membrane, and relief comes instantly. It is just what every cold and catarrh sufferer needs. Don't stay stuffed up and miserable.

Union Suited America "Says Munsingwear"

Don't Say Underwear, Say Munsingwear

Who Put the U. S. in Union Suits?

MUNSINGWEAR — comes the answer from millions of union suited Americans. The Makers of Munsingwear so far as is known were the first manufacturers of knit union suits in a large way.

Their determination to produce an undergarment so faultless in fashion fabric, finish and fit, so lasting in union-suit satisfaction, so comfort giving, has brought a nation wide endorsement and demand requiring more than 10,000,000 garments annually.

Into each Munsingwear garment is woven or knit an unvarying quality, washability, perfection of fit and superservice.

When you say Munsingwear you get the culmination of underwear comfort

No ill-fitting, scratchy, irritating slip up and pull down undergarments, but soft, snug-fitting union suits, comfortable to every twist of the body.

Munsingwear is underwear as a commodity.

It meets every test of hard service. It laughs at the laundry. It's a wonder in the wear as well as the wash and it's economical, too. In all styles, sizes and fabrics for all ages.

OUR STOCK of Fall and Winter MUNSINGWEAR is waiting for you. Come in today and choose from the variety of styles and fabrics. It's a 100 per cent right, all the way through—Buttons too.

Unlike Topsy— Swift & Company Has Not "Jest Grown"

Swift & Company, in fifty years of well ordered growth, has become one of the great national services because it has learned to do something for the American people which they needed to have done for them, in the way in which they preferred to have it done.

It has met each successive demand, in the changing conditions of national life, by getting good meat to increasing millions effectively, efficiently, economically, and expeditiously.

The Swift & Company packing plants, refrigerator cars, car routes, branch houses, organization, and personnel of today are the practical solutions, born of practical experience, to the food problems of a half a century.

Because of all of these elements working in correlation and unison, Swift & Company is able to supply more and better meat to more people than would have been possible otherwise, at a net profit per pound of meat so low (a fraction of a cent) that the consumer price is practically unaffected.

Strip away any portion of this vast, smooth-running human machine, and you make a large part of the meat supply uncertain, lose the benefit of half a century of fruitful experience, and scatter the intelligent energies of men who have devoted a life work toward meeting the needs of a nation in one vital field.

The booklet of preceding chapters in this story of the packing industry will be mailed on request to
