SOCIAL

(Continued from page 3)

noon. At a later hour light refreshments were served by the hostess. Additional guests were Mrs. Olin Nebergall, Mrs. Glover Newman, Mrs. Fred Harris and Mrs. Vernita Warner.

At the home of Miss Lois Nebergall, the Alpha Nu girls will meet tonight to pass a jolly evening together. After a social time, dainty refreshments will be served at a late hour. The guests will be Grace McCauley, Beulah Dedaney, Thelma Barnett, Vera Burnett, Vera Brown, Viola Wrochell and the hostess.

Mrs. Winnifred Worrell is spending the week-end in Corvallis at the home of Mrs. J. J. Collins.

One of the most interesting meetings of the season for the Eastern Star occurred this week on Wednesday night, when they entertained as their honor guest Mrs. Mabel Settlemyer, grand worthy matron of Oregon. A large crowd were in attendance for this delightful evening and Mr. and Mrs. Joe Gilbert were initiated at this time. At the close of the meeting light refreshments were served at a prettily decked table graced by ferns and chrysanthemums.

A lovely luncheon was presided over Wednesday noon by Mrs. Mary Bilyou for which Mrs. Mabel Settlemyer was the motif. Completing the attractive appointments, a large bouquet of yellow chrysanthemums adorned the table. The guests complimented at this time were Mrs. G. H. Bennett, Mrs. G. T. Hockensmith, Mrs. J. S. Van Winkle and Mrs. Settlemyer.

For the pleasure of Mrs. Mabel Settlemyer, Mrs. Earl C. Randsberry presided as hostess to dinner Wednesday evening. Flowers of the season bedecked the handsomely appointed table and adorned the rooms.

So that the businessmen of Albany might meet Prof. Frank J. Laube of the University of Washington, a banquet was given at the St. Francis hotel Wednesday evening under the direction of the Red Cross. Prof. Laube is making a tour of the Northwest in behalf of the Red Cross home service to interest the people in the reemployment of soldiers upon their return. A most interesting time was passed by the large number present.

A pleasant social time was enjoyed last night at the home of Mrs. Otto Bloom, when the Sunday school class of Mr. and Mrs. W. C. Burkhardt were guests. Social diversions were completed at a late hour by refreshments.

On Business Trip—L. L. Swan left last night on a business trip to Klamath Falls. He will return next week.

Wounded in Action—Attorney H. G. Hoy received word late yesterday afternoon that his nephew, John W. Hoy, had been wounded in action. The young man is a son of Wm. Hoy of South Dakota.

UNITED OLD AND NEW WORLD

Atlantic Cable, After Three Disheartening Failures, Was Successfully Laid in July August, 1858.

Sixty years ago our broad Yankee-land awoke and learned that the old country and the new had been united by a magical tie—the Atlantic cable.

Through the courage and persistence of three Americans—there were others, but the three were the actual cable sponsors—Cyrus W. Field, his brother, David Dudley Field, and that fine old philanthropist, Peter Cooper—the great project was carried over. The total cost was \$1,834,500, the cable alone taking \$1,250,250, and the line crossed from Trinity bay, Newfoundland, to Valentia, Ireland, the cable being very close to 2,500 miles long.

Three times the attempt to lay the cable had failed, chiefly owing to defects in its material. The fourth attempt was successful. The Niagara, then the largest ship in the United States navy, and the Agamemnon, a British warship, met in midocean on July 29, 1858, each carrying a section of the cable. The ends were carefully spliced and then the two ships turned homeward, moving slowly as they paid out the cable. On August 4 the Niagara reached Trinity bay; the Agamemnon reached Valentia on the 5th. On August 16 the cable was pronounced in working order, and here is the first official message that passed across:

"Europe and America are united by telegraphy. Glory to God in the highest; on earth peace, good will toward men."

AT END OF GLACIAL PERIOD

Geological Authority Makes Deductions From Shrinking of Great Ice Cap at the South Pole.

Dr. Marsden Manson of San Francisco, an eminent authority on geology, points to the fact established by recent Antarctic explorers that the great ice cap is shrinking. From this he draws the conclusion that the gradual subsidence of the Age of Ice of which the polar ice caps are the existing remnants, is still going on and that we live, so to speak, at the tail end of the glacial period. He expresses the conviction that the same succession of geological climates has prevailed in Antarctica as in other latitudes, and says that the evidence collected in recent Antarctic explorations is corroborated by the comparatively recent uncovering of temperate land areas and the progressive retreat of the snow line to higher elevations in temperate and tropical latitudes and toward the poles at sea level. He comes to the conclusion that the disappearance of the Ice Age is an active present process and must be accounted for by activities and energies now at work. He considers it as proved that the rates and lines of retreat are not have been determined by exposure to solar energy and the temperature established thereby and by the difference in the specific heat of the land and water hemispheres.

Eyes of Fishes.

Although there are a few exceptions to the rule, the eyes of fishes are intended to see beneath the water with, and, as in the case of the eyes in all animals, sight only becomes possible to the eyes of diurnal animals when there is light present. To be sure, there may be fishes that are nocturnal fishes, just as there are nocturnal mammals and birds of various kinds; but the majority of fish doubtless depend upon the presence of light in order to see or use their eyes. Where the light is removed, and the removal persists for an indefinite period, it has such an effect upon the eyes of fishes that some of their descendants may, within comparatively short space of time, lose the sense of sight entirely.

Town Has Long History.

Mannheim isn't an old town. The village that preceded it dated back a thousand years, but the real Mannheim has just entered its fourth century. It was founded by Protestant refugees from Holland, who gave it a strongly fortified castle and brought no end of trouble on the place. During the Thirty Years' war that castle and the town were taken and retaken no less than five times. In 1794 it was in the hands of the French and then an Austrian army bombarded it so severely that scarcely a building was left unharmed. In 1803 a grand duke had the fortifications razed and Mannheim became an open town.

DRINK HOT WATER BEFORE BREAKFAST

Says you really feel clean, sweet and fresh inside, and are seldom ill.

If you are accustomed to wake up with a coated tongue, foul breath or a dull, dizzy headache; or, if your meals sour and turn into gas and acids, you have a real surprise awaiting you.

To-morrow morning, immediately upon arising, drink a glass of hot water with a teaspoonful of limestone phosphate in it. This is intended to first neutralize and then wash out of your stomach, liver, kidneys and thirty feet of intestines all the indigestible waste, poisons, sour bile and toxins, thus cleansing, sweetening and purifying the entire alimentary canal.

Those subject to sick headaches, backache, bilious attacks, constipation or any form of stomach trouble, are urged to get a quarter pound of limestone phosphate from the drug store and begin enjoying this morning inside-bath. It is said that men and women who try this become enthusiastic and keep it up daily. It is a splendid health measure for it is more important to keep clean and pure on the inside than on the outside, because the skin pores do not absorb impurities into the blood, causing disease, while the bowel pores do.

The principle of bathing inside is not new, as millions of people practice it. Just as hot water and soap cleanse, purify and freshen the skin, so hot water and a teaspoonful of limestone phosphate act on the stomach, liver, kidneys and bowels. Limestone phosphate is an inexpensive white powder and almost tasteless.
