MAZOLA

is the pure vegetable oil for
better cooking and
salad dressings

THE pure, wholesome, and delicious qualities of Mazola appeal to the housewife from the standpoint of cooking results—in deep frying, sautéing, shortening and salad dressings.

And at the same time she knows she is doing her share toward saving the country's animal fats—butter, lard, suet. Mazola is produced from the heart of golden American corn.

It does not transmit taste or odor from one food to another—can be used over and over again—a great factor in economical cooking.

Mazola is sold in pint, quart, half-gallon and gallon sizes. Your grocer will give you a copy of the free Mazola Book of Recipes—or write us direct.

Your money refunded if Mazola does not give entire satisfaction.

Cheer up,
Kamerad; no-
body's going to
eat you! Take
a little chew of
Gravely and
you'll feel
better.

Every Few Days Send Him a pouch of Real GRAVELY Chewing Plug

Think of the welcome he will give it—this condensed plug of fine tobacco that slips flat into his pocket, ready to give him tobacco comfort and satisfaction anywhere, all the time!

Give any man a chew of Real Gravely Plug, and he will tell you that's the kind to send. Send the best!

Ordinary plug is false economy. It costs less per week to chew Real Gravely, because a small chew of it lasts a long while.

If you smoke a pipe, slice Gravely with your knife and add a little to your smoking tobacco. It will give flavor—improve your smoke.

SEND YOUR FRIEND IN THE U. S. SERVICE A POUCH OF GRAVELY. Dealers all around here carry it in 10c pouches. A 3c stamp will put it into his hands in any Training Camp or Seaport of the U. S. A. Even "over there" a 3c stamp will take it to him. Your dealer will supply envelope and give you official directions how to address it.

HER SACRIFICE NOT GREAT

Simple Explanation of Four-Star Service Flag That Woman Had So Proudly Displayed.

One day a woman reporter noticed, in the front window of a quaint little cottage, a service flag proudly bearing four stars.

"Ah," thought she, "here's real sacrifice. I guess I'll stop in and get a story."

She could get no response from her persistent knocking, and so she went next door to see what information she could collect in regard to the cottage of the four service stars. Upon ringing the neighbor's bell she was confronted by a rather stout, elderly woman with a merry twinkle in her eye.

"Here," thought the young woman, "is where I got the right side of the story. Then aloud she said:

"I am a newspaper reporter. Can you tell me something about the people next door. No one seems to be at home, and I noticed there were four stars in their service flag. I wonder who lives there, and if all the boys in the family have enlisted."

The woman smiled a bit and replied, "The lady's name is Miss Harlan. Them stars is not her sons, them's for boarders."—Los Angeles Times.

A STRONG DISTRIBUTE of the force of American "slangage" is afforded in one of America's leading preachers. The speaker, a Canadian audience on Uncle Sam's efforts. In a 10-minute talk there occurred, among others, these "gems": "We are on this job to the finish. We are prepared to fight till hell itself freezes over, and if Germany isn't bent then we'll buy skates and get after her on the ice." "This kaiser is the biggest duplex, double-action, high-powered liar in history. He told his people the Americans could never get to France. Well, he and his people have got another guess coming."

Cement Industry Big.

Statistics of the cement industry in the United States in 1917, prepared by the United States geological survey, indicates that the total shipments of Portland cement from the mills amounted to 90,709,474 barrels valued in bulk at the mills at \$122,745,088. This represents a decrease in quantity of 4.1 per cent and an increase in value of 17.8 per cent compared with 1916. The production of Portland cement in 1917 was 92,814,292 barrels, compared with 91,521,198 barrels in 1916, an increase of 1.4 per cent. This production holds the record, the next highest output, 92,097,131 barrels, having been in 1913.

How European City Utilizes Water Power Which Otherwise Would Be of No Value.

An electric-heating system which utilizes power that would otherwise go to waste has been installed in a school in a southern European city. The existing hot-water pipes and radiators are connected with a well-insulated water tank of 1,200-gallons' capacity. In this reservoir electric resistances are built, and at night are supplied with current which raises the water to well above the boiling point. The cost of the current is low because the water power used to produce it normally would go to waste. During the day the hot water is allowed to circulate through the radiators, its volume being sufficient to warm the rooms without using more current. The desired temperature is maintained by a thermostat.—Popular Mechanics Magazine.

What Determines Meat and Live-Stock Prices?

Some stock men still think that Swift & Company—and other big packers—can pay as little for live-stock as they wish.

Some consumers are still led to believe that the packers can charge as much for dressed meat as they wish.

This is not true. These prices are fixed by a law of human nature as old as human nature itself—the law of supply and demand.

When more people want meat than there is meat to be had, the scramble along the line to get it for them sends prices up. When there is more meat than there are people who want it, the scramble all along the line to get rid of it within a few days, while it is still fresh, sends prices down.

When prices of meat go up, Swift & Company not only can pay the producer more, but has to pay him more, or some other packer will.

Similarly, when prices recede all down the line Swift & Company cannot continue to pay the producer the same prices as before, and still remain in the packing business.

All the packer can do is to keep the expense of turning stock into meat at a minimum, so that the consumer can get as much as possible for his money, and the producer as much as possible for his

Thanks to its splendid plants, modern methods, branch houses, car routes, fleet of refrigerator cars, experience and organization, Swift & Company is able to pay for live cattle 90 per cent of what it receives for beef and by-products, and to cover expense of production and distribution, as well as its profit (a small fraction of a cent per pound), out of the other 10 per cent.

Swift & Company, U. S. A.

Ladies' Silk and Jersey Dresses

A good assortment of all sizes and colors, and many styles to show you. Prices you'll find in many cases way below so-called Sale Prices at other stores.
