You Will Be Interested
In Seeing How This
Machine Works

Did you ever see a machine that would actually keep books—a machine that would add columns of figures and subtract other columns of figures, without an error, and then print the correct difference or balance.

We have just installed a machine of this character which will be used from now on to keep our books. It is known as the Burroughs Bookkeeping Machine and is really a wonderful piece of mechanism.

We know you will be interested in seeing how this machine works, so we have made arrangements to give a public demonstration of this mechanical bookkeeper in our banking room on—

Saturday Afternoon 1 to 3 p. m.

Monday 10 to 12 and 1 to 3

You and your friends are cordially invited to come and witness this demonstration. You will find it interesting and instructive.

The installation of this improved, up-to-date equipment is in keeping with the progressive policy of this bank, enabling us to give the most modern banking service to our patrons.
