

Loganberries Compared with Hops and Wheat

LOGANBERRIES on Basis of One Acre

FIRST YEAR

Preparing ground for planting	\$ 5.00
Plants 8x8 or 680 per acre	10.20
Cost of planting	5.00
Cultivation	10.00
	\$30.20

SECOND YEAR

Cultivation for season	\$10.00
Trellis—170 fir posts per acre, 8x32 at 10c each	17.00
Wire No. 12, 3 wires, 500 lbs. at 4c	20.00
Training vines on trellis	3.00
Estimated yield 1000 lbs.—Cost of picking at 1 1-2c lb.	15.00
	\$65.00

RECEIPTS—1000 lbs. at 5c lb. \$50.00

THIRD YEAR

Cost of Production	2 tons	3 tons	4 tons	5 tons
Cultivation thruout season	\$ 10.00	\$ 10.00	\$ 10.00	\$ 10.00
Tying, training vines to trellis	15.00	17.00	19.00	20.00
Hoing around hills	8.00	8.00	8.00	8.00
Picking at 1 1-2c per lb.	60.00	90.00	120.00	150.00
Cost of labor and picking	93.00	125.00	157.00	188.00
Receipts per acre at 5c lb.	\$200.00	\$300.00	\$400.00	\$500.00
Net profits per acre	\$107.00	\$175.00	\$243.00	\$312.00
	At 2 tons	At 3 tons	At 4 tons	At 5 tons

HOPS on Basis of One Acre

1200 lbs. per acre at average cost of production of 12c per lb.
Loganberries at 2 tons per acre are equal to Hops at 21c per lb.
Loganberries at 3 tons per acre are equal to Hops at 26 1-2c per lb.
Loganberries at 4 tons per acre are equal to Hops at 32c per lb.
Loganberries at 5 tons per acre are equal to Hops at 38c per lb.

WHEAT on Basis of One Acre

25 bushels per acre at an average cost per bushel of \$1.00 and sale at \$2 per bushel
Loganberries at 2 tons per acre are equal to Wheat at \$4.00 per bushel.
Loganberries at 3 tons per acre are equal to Wheat at \$7.00 per bushel.
Loganberries at 4 tons per acre are equal to Wheat at \$10.00 per bushel.
Loganberries at 5 tons per acre are equal to Wheat at \$12.50 per bushel.

Mrs. C. J. Gibson and three children and a pet rabbit changed cars at the S. P. depot today for Brownsville. They go from there to Crawfordsville to make their future home.

FATIMA COUPONS USED FOR MONEY

Life with A. E. F. in Siberia Is Described by Former Salem Man

First Lieutenant Carl D. Gabrielson, with the 27th regiment, A.E.F. in Siberia, gives a glimpse of life in that interesting country in a letter to a friend in this city. The letter was written Feb. 16 and reached here March 17. Lieut. Gabrielson is a Salem boy, former prominent Salem high school and University of Oregon

HAVE ROSY CHEEKS AND FEEL FRESH AS A DAISY—TRY THIS!

Says glass of hot water with phosphate before breakfast washes out poisons.

To see the tinge of healthy bloom in your face, to see your skin get clearer and clearer, to wake up without a headache, backache, coated tongue or a nasty breath, in fact to feel your best, day in and day out, just try inside-bathing every morning for one week.

Before breakfast each day, drink a glass of real hot water with a teaspoonful of limestone phosphate in it as a harmless means of washing from the stomach, liver, kidneys and bowels the previous day's indigestible waste, sour bile and toxins; thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach. The action of hot water and limestone phosphate on an empty stomach is wonderfully invigorating. It cleans out all the sour fermentations, gases and acidity and gives one a splendid appetite for breakfast.

A quarter pound of limestone phosphate will cost very little at the drug store but is sufficient to demonstrate that just as soap and hot water cleanses, sweetens and freshens the skin, so hot water and limestone phosphate act on the blood and internal organs. Those who are subject to constipation, bilious attacks, acid stomach, rheumatic twinges, also those whose skin is sallow and complexion pallid, are assured that one week of inside-bathing will have them both looking and feeling better in every way.

base ball player and is well known in Albany where he has visited many times. The letter in part is as follows:

"I put in my spare time gathering material for the fine nest of lies I am going to have ready to offer some of the weird tales I know I am going to be forced to listen to when the boys from France arrive in our fair city of Salem.

"My spare time isn't much however as I am adjutant of the 1st Bn., of the 27th, in command of a small detachment of Hq. Co., and in charge of the German prison camp at this post.

"I came over last fall arriving here on Sept. 2, along with 16 officers and 1250 men from the 8th Inf. We are filled up to war strength but we can't find the damn war.

"However I have enjoyed myself and had some good experiences among them living in a box car from Oct. 15 to Dec. 15. I have seen some pretty good cities in my travels, have danced and drunk coffee with the barishnas (you know—girls,) attended dinners, etc., with Russian, Japanese etc., officers gone ice skating, watched the Japs butcher a frozen pig with an ax (Curt Cross has got a lot to learn) and in fact have had a real cosmopolitan time in the best cosmopolitan country on the globe.

"Economically and politically this country could give Mexico the joker in the hole and win all its money playing stud poker. The air feels like an earthquake was about to break loose, if you know what I mean. As for money making here you would have to have a sack full of kopeks and put a padlock on the title to your property. Speaking of kopeks, ronbles etc., there are more kinds of money here than there are different kinds of nationalities to spend it. The highest denomination we had was a Fatima coupon till they got next to it.

"I could go on telling you about this country but I'm afraid I'd say something you might think wasn't true so I will wait till I get home where you can defend yourself."

Spending Weekend—

Mr. and Mrs. Emil Hiebner of Forest Grove are here for a weekend visit at the home of Mr. and Mrs. F. M. French.

"Pretty" Describes Many New Frocks

Old-time elegance, daintiness, quaintness—these are the things that make themselves evident in those spring frocks that are made of printed cottons or silks. Women have turned again to clothes that are truthfully described as pretty. Not rich or showy, but just full of pretty touches, in color and material and in style and accessories. All the way from simple "pore dresses" to frocks for all sorts of afternoon wear, there are pretty things in clothes made from new fabrics.

In cotton, there are English prints, percale, printed voile, cotton foulard and lawns to be reckoned with for making the simple dresses that are so naive and dainty. They provide many lovely colors and are combined with fine organdie in frocks that are charming. Some of these fabrics are bordered, as in times gone by, and these borders, make accessories, as the pockets, girde and collar, that set off the pattern in the material and emphasize its color and character.

For afternoon wear there are the printed foulards in a very light, soft

weave, that are made up with plain georgette crepe, or with organdie in accessories. Organdie collars and cuffs and neck frills are lovely on them. Very fine tucks and fine, narrow Val lace edging reveal their perennial beauty and popularity in these accessories. Velvet and other ribbon girdles finish the engaging story of these frocks.

A modest cotton foulard, shown in the picture, appeared among the earliest models made of printed fabrics. It is less summery than many of the later arrivals that have short sleeves supplemented by organdie flounces, or wide flowing sleeves. But it is a practical little dress, so silky looking that one must look twice to discover that it is made of cotton. It has an organdie frill at the neck and a girde of velvet ribbon. In the French blue and light tan color combination pictured with blue girde it deserves to be classed among pretty dresses.

Above all things one's millinery must be kept fresh looking and immaculately clean. There are many millinery materials that are always in style, as velvet and velvet ribbons, well-made flowers, laces, ribbons, straw hats, crepe, and chiffons. They become soiled and mussed, but can be cleaned and freshened up by simple processes available at home. Now that spring is near, a becoming straw hat may only need repolishing, or to have the trimmings freshened up, to serve during the early spring and as a change throughout the season.

For colored straw hats there are dyes which are usually on sale in drug stores, ready to apply, which will restore the color of the straw or change it to another color. There are several reliable dyes that will change colored hats into black ones. Most of these dyes give the hat a fine luster and it looks practically new, after dyeing. Often a faded hat can be successfully restored to color by applying the colors mixed with gasoline, as described in a former article. Some hats can be scoured with soapuds, as leghorn or Panama straws. In this case the suds is used, but with a view to keeping the straw from getting very wet. To restore a natural straw color, a hat may be cleaned with lemon juice and sulphur. A white straw may be washed with oxalic acid diluted with water. After a leghorn hat has been cleaned it may be bleached by suspending it over a burning sulphur candle. Burn the sulphur in the bottom of a barrel, suspending the hat at the top so that it will not scorch. A felt hat may be successfully scoured with the finest sandpaper. Ammonia will often restore color in colored straw hats. Wring a cloth out of half a pint of hot water to which a teaspoonful of ammonia has been added and cover the hat with this cloth. Allow it to re-

main a while. If the brim needs pressing, cover it with the cloth and iron with a warm iron. If the color is not sufficiently restored by this process mix tube paint and gasoline and dip the hat in it, or brush it on. There are several reliable hat dyes that can be bought with directions for using that will quickly renovate straw hats.

To Freshen Flowers.

Mix tube paint and gasoline with the color desired and dip faded flowers into this dye. Petals may be shaded and veined with tube paints. Flowers that are crumpled should be held over dry steam and gently shaken. When they have been steamed and tinted take small, sharp scissors and trim away any frayed edges. One can often make flowers look as good as new by these processes.

Julia Bittendy

Jet Buckles, White Shoes.

White buckskin shoes shown for the South show jet buckles of various sorts. Usually they are very effective. One method of mounting the buckle is to place it on a foundation composed of closely plaited black ribbon, which extends just far enough to give the buckle a little backing. Sometimes, too, white satin evening slippers show jet buckles, or small jet buttons fastened that against the tongue section or the edge of the shoe as it slopes up to the instep.

To Wash Chamois Skin.

To wash chamois skin put it through warm soapuds, rinse in several warm waters, draw it through the hand to squeeze the water out and hang up to dry. Pull while drying, if you would have it smooth.

Yesterday's temperature ranged from 40 to 57 degrees. The rainfall was .45 inch and the Willamette rained to 9.2 feet.
