Sanderson's Bridge
Corn is coming down, down from the garnet where it has been preserved through the winter and planted in the soil with the expectation of a bumper crop next autumn. Some of the farmers' corn is coming up again and looking vigorous.

The spring showers have given new life to all vegetation and filled the hearts of the husbandmen with joy. Prospects are bright for a splendid harvest in this community.

Indications are that the fruit crop will be light this season.

The boys are coming home from the service. Roy Kinzer arrived home last Saturday.

Arthur and Horace Parson returned home from Eastern Oregon last week.

Charles Pearce was honorably mustered out and arrived home last week.

School District 114 will have graduating exercises next Friday evening.

COMB SAGE TEA INTO GRAY HAIR

Darkens Beautifully and Restores Its Natural Color and Lustre at Once.

Common garden sage brewed into a heavy tea, with sulphur and alcohol added, will turn gray, streaked and faded hair beautifully dark and luxuriant. Mixing the Sage Tea and Sulphur recipe at home, though, is troublesome. An easier way is to get the ready-to-use preparation improved by the addition of other ingredients a large bottle, at little cost, at drug stores, known as "Weyth's Sage and Sulphur Compound," thus avoiding a lot of fuss.

While gray, faded hair is not sinful, we all desire to retain our youthful appearance and attractiveness. By darkening your hair with Weyth's Sage and Sulphur Compound, no one can tell, because it does it so naturally, so evenly. You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning all gray hairs have disappeared. After another application or two your hair becomes beautifully dark, glossy, soft and luxuriant and you appear years younger. Weyth's Sage and Sulphur Compound is a delightful toilet preparation. It is not intended for the cure, mitigation or prevention of disease.

BEGIN HOT WATER DRINKING IF YOU DON'T FEEL RIGHT

Says glass of hot water with phosphate before breakfast washes out poisons.

If you wake up with a bad taste, bad breath and tongue is coated; if your head is dull or aching; if what you eat sours and forms gas and acid in stomach, or you are bilious, constipated, nervous, shallow and can't get feeling just right, begin inside bathing. Drink before breakfast, a glass of real hot water with a teaspoonful of limestone phosphate in it. This will flush the poisons and toxins from stomach, liver, kidneys and bowels and cleanse, sweeten and purify the entire alimentary tract. Do your inside bathing immediately upon arising in the morning to wash out of the system all the previous day's poisonous waste, gas and sour bile before putting more food into the stomach.

To feel like young folks feel; like you felt before your blood, nerves and muscles became loaded with body impurities, get from your pharmacist a quarter pound of limestone phosphate which is inexpensive and almost tasteless, except for a sourish twinge which is not unpleasant.

Just as soap and hot water act on the skin, cleansing, sweetening and freshening, so hot water and limestone phosphate act on the stomach, liver, kidneys and bowels. Men and women who are usually constipated, bilious, headachy or have any stomach disorder should begin this inside bathing before breakfast. They are assured they will become real cranks on the subject shortly.

aspect the plants. If not too badly mixed or affected with too much disease the crop is continued for certification. After the potatoes are dug, sorted and stored, they are given final inspection and if passed each sack will be tagged with the official certificate and may be offered at certified prices.

Fees for certification run about \$2 to \$3 an acre.

A bulletin giving particulars has been published by the O. A. C. extension service and may be had free on application. Its writer is M. B. McKay, official inspector and associate plant pathologist.

Twelve Oregon farmers grow certified spuds. Aim of Certification is to Supply Growers with Sound and True Type Potato Seed

O. A. C., Corvallis, May 21.—Special.—Twelve Oregon potato growers reached the standard of excellence required in growing certified seed potatoes, in 1918, and have received certificates. Seven of them grew their certified crops in Benton county, three in Lane, one each in Linn and Marion. The largest crop was 1950 sacks produced in Lane county. The total production was 5380 sacks.

The purpose of seed certification is to supply growers with potatoes that are disease-free, true to variety type, and of desirable market qualities. The ultimate aim is to improve the quality, yield and market value of the Oregon potato crop and restore it to its former vantage point of preference over all others.

Any grower with a good strain of potatoes may enter his field for certification. He must handle his crop in accordance with the recommendations of the official inspector, who will visit his field twice a year and in-
