Ford

THE UNIVERSAL CAR

WHEN YOU WANT your Ford car repaired, insist always upon getting the genuine Ford Parts, made by the Ford Motor Company, in order to insure reliable quality. There are "spurious," "counterfeit," "imitation" parts made by outside concerns who have no regard for quality in material, so insist on your Garage or Repair Man furnishing you the genuine Ford Parts. All reliable garages may now buy the genuine Ford Parts from us—so there's no excuse for any one using the 'bogus' parts. To be sure, bring your car to us for repairs or replacements.

LITTLE LESSON FOR AGENT

Speaking of Etiquette Reminded Servant Girl of a Few Ideas She Had in Mind.

"Madam," she began, as the door opened, "I am selling a new book on 'Etiquette and Deportment.'"

"Oh, you are?" she responded. "Go down there and clean the mud from your feet."

"Yes'm. As I was saying, madam, I am sell—"

"Take off your hat! Never address a strange lady at her door without removing your hat."

"Yes'm. Now, then, as I was saying—"

"Throw away your pipe. If a gentleman uses tobacco he is careful not to disgust others by the habit."

"Wait. Put that dirty handkerchief out of sight and use less grease on your hair in the future. Now you look a bit decent. You have a book on 'Etiquette and Deportment.' Very well, I don't want it. I am only the servant girl. Go up the steps to the front door and talk with the lady of the house. She called me a down-right, no-doubt-about-it idiot this morning, and I think the book you're selling is just what she requires."

Aluminum Plating.

An aluminum plating for airplane propellers, has been devised for the purpose of protecting the wood from the influence of the weather, which has been a serious problem heretofore. The plating is a thin leaf which is incorporated in the finish of the propellers, and the idea was developed by the forest products laboratory at Madison, Wis., and placed in production by the war department. The process is practically 100 per cent effective in preventing absorption of water, particularly in the storage stage. A French authority states that 80 per cent of the French propellers produced are rejected by the pilots mainly because they are out of balance. This difficulty is due largely to unequal absorption or distribution of moisture and can be greatly reduced by an effective water-proofing coating.

Americans Rear New Town.

A number of views of the up-to-date village, built by the American Red Cross near Pisa, Italy, are shown in Popular Mechanics Magazine. The village has been built to provide homes for artisans and their families who fled from Venice during the war and since have not been in a position to return. The village will accommodate 2,000 persons.

Flower Language.

In remote Alpine hamlets and villages, especially in the Bernese Oberland, there still exist ancient and pretty customs of proposing marriage by a language of flowers. If a maid accepts a bouquet of edelweiss from a man she at the same time accepts him as her fiance, the idea being that the man has risked his life to obtain the flowers for the woman he loves.

Another method which exists in the canton of Glarus is for the young man to place a flower pot containing a single rose and a note on the window sill of the girl's room when she is absent from home, and wait—perhaps days—for a reply. If the maid takes the rose the young man boldly enters the house to arrange matters with her parents, but if the rose is allowed to fade away the proposal is rejected without a single word having been exchanged between the couple.

They and We.

A wounded corporal in a hospital told how, while on patrol duty, he had seen the body of a noncommissioned French officer hanging by the feet, his face bashed in with muskets.

"My men and I were furious," he said, "and made up our minds that we'd do the same thing to the first German we caught. That night we found two Germans hidden in a barn. We fell on them and then as they were hungry we gave them bread. We could not do what they did, for we are not of the same race."—Everybody's Magazine.

Fowls Plucked With Vacuum.

A machine of the vacuum type for plucking fowls is described and illustrated in Popular Mechanics magazine. With it, it is said, a person can remove all the feathers, dry, from an average-sized bird in about five minutes. A motor-driven fan creates suction in a large flexible tube, at the free end of which is a special plucking apparatus. Once loosened, the feathers pass through the tube into a large receptacle overhead.

No Honeymoon Trip.

I attended a wedding of a dear girl friend whose father was a well-to-do farmer. After the ceremony we girls crowded around the blushing bride and she was asked where they expected to go on their honeymoon trip. She replied: "We aren't going to take a trip, for the money we would spend will buy a nice cow."—Chicago Tribune.
