CHIMES TO STRIKE THE PASSING HOUR

J. W. Cusick & Co. Bank Offers New Convenience for the Public

The J. W. Cusick & Co. bank has erected a magnificent electric illuminated clock on the front of its bank building on First street.

The most distinctive feature of the clock other than its unusually artistic appearance and the perfection of its construction and mechanism is the complete set of Westminster chimes with which it is equipped. These ring every quarter hour and may be heard practically as far as the clock may be seen.

The big clocks are operated by electricity from a master clock inside the building in the main banking room. This is an especially handsome structure of bronze and plate glass construction, with a 12-inch dial, and guaranteed to keep practically perfect time.

The clock is eight feet four inches in height by three and one-half feet in width, of dark green bronze, with copper hood at top and bottom. The dial of the clock is 30 inches in diameter, on pearl white glass with crystal glass on the outside.

President E. D. Cusick offers the following explanation of the beautiful Westminster chimes, consisting of five tubular chime bells: "Years of prosperous banking have been made possible only by your support. We wanted to show our appreciation in a substantial way and have therefore purchased of the manufacturers, the O. B. McClintock company of Minneapolis, including the exclusive rights for this city, a large handsome clock combined with a set of the softest and most beautiful chimes ever heard in any city of the old or new world."

The Chimes
"Lord, through this hour
Be Thou our guide
So, by Thy power
No foot shall slide."

"Everyone who has lived within sound of the bells of Westminster is familiar with the above verse. The origin of the carillon has never been positively established. Some writers accredited it to a Mr. Crouch, who was a pupil of Dr. Randall, Regius Professor of Music. This, however, is disputed by other writers who accredited it to Dr. Randall's conception of the idea taken from a movement in the fifth bar of the opening of Handel's Symphony, "I know that my redeemer liveth" The chimes were first fitted to the clock of the university church, St. Mary's the Great, Cambridge, but were not copied until they were reproduced on a very large scale in the Victoria clock of the house of parliament.

"At the quarter half and three quarter hour, these chimes will ring out in various musical combinations. At a quarter past the hour three strokes—Westminster; at half past the hour, eight strokes—Rex; at three quarters past the hour 12 strokes—Cathedral peal, and on the hour 16 strokes—Westminster; followed by the striking of the full hour, in a clear vibrant tone.

Sodaville News
SODAVILLE, June 18.—Special.—H. D. Klum visited Sweet Home yesterday, making arrangements to take work for the summer in the government forestry service of the Santiam reserve.

Ed Trobaugh and Elza Smith have been hauling railway ties from here to Lebanon during the past week. Ubbe Peters of near Albany held religious services at the Evangelical church yesterday.

John Budley and Ed Myers of Lebanon, veterans of the Civil War, were here last Saturday trying to improve the condition of their fellow-comrade, Isaac Watson.

Many pleasure-seekers were here

last Sunday enjoying the sodawater, and the scenery peculiar to June in Western Oregon.

Mrs. C. L. Fenton and daughter Gertrude of Corvallis spent Wednesday here looking after property interests and renewing acquaintances.

Many of the citizens of this community were at Lebanon Sunday to attend the funeral of Mrs. A. R. Simons, who died at that place last Friday after a brief illness. Mrs. Simons was a pioneer resident of this community, having lived on the 'old home' place one mile north of town, for more than 50 years. Her kindness and exemplary life endeared her to a host of sorrowing friends.

Which for you? An old age burdened by blindness or feeble sight or one in which you retain your eyesight practically unimpaired? You will not lose the use of your eyes if we attend to them. Often good care and simple glasses in youth or middle age prevent disaster in later life. Consult us in time.
