

A Triumph of Toughness

And yet, the 'Royal Cord' possesses amazing buoyancy and life.

That's the secret of this famous tire's success.

Hardihood that means many extra miles, combined with the luxury of easier riding.

Let us put 'Royal Cords' on your car. They are the utmost in equipment—the finest tires in the world.

United States Tires are Good Tires

We Know United States Tires Are Good Tires That's Why We Sell Them.

Swedish Missionary Coming—
Rev. Olson a Swedish missionary of Portland, will conduct services in

the Baptist church of the city next Sunday at 2:30 o'clock. The general public is cordially invited to attend.

DANCE THURSDAY NIGHT
The Aloha club will give a dance on Thursday evening, June 19th, at their hall. Everyone invited. 16j19

Buy Your FORDSON TRACTOR AT ONCE

Now is the logical and safe time to buy your FORDSON TRACTOR. Manufacturers know that more machines will be wanted during this coming year than can be supplied. This is particularly true in regard to the FORDSON. Its popularity has created a demand that makes it certain that many farmers desirous of obtaining a FORDSON will be disappointed.

The FORDSON is simple to operate, compact, powerful, economical—operating on cheapest fuel, kerosene. Just as satisfactory at the belt as on the drawbar.

HAD "GONE WEST"

Pathetic Incident in Hospital Bombarded by Huns.

Wounded Young French Infantry Officer Thought He was Going "Over the Top," and in That Belief Passed On.

The head nurse watched the stretcher bearers clatter slowly and awkwardly down the path and disappear in the darkness bearing between them a silent, blanket-wrapped figure. Then slowly and thoughtfully she turned and entered the field hospital tent. The pale little nurses' aid, garbed in the picturesque blue of the American Red Cross, rose and came to meet her. In subdued whispers, scarcely audible in the big vacant stillness of the tent, she told the story of any changes which had taken place in the condition of the boys who lay so bravely silent on the 50 tiny cots.

"Bartrand, that young infantry officer in bed No. 9, with the bad chest wound—he does not seem right," she said softly. "His lips are blue, and he sleeps so much."

"Bring your flash," replied the head nurse, as she led the way over to the dark corner, where, in a bed separated from the rest, the young Bartrand lay, apparently sleeping. Leaning over him lightly, with a mother touch she laid her hand on his forehead. The boy's eyes opened, dazedly, and blinked in the glare of the aid's flashlight. Then, as with an effort, he smiled.

Suddenly the tent flap nearest them opened. The Scotch orderly entered, reached quickly for the knob that governed the big center tent light and switched it off. Without a word the aid covered her flash and sprang to extinguish the desk light, while old Macdun, the trusty, crept along the tent wall behind the beds to be sure that each window was tightly closed.

Overhead there gradually came into hearing a steady, regularly interrupted drone, like that of a malignant insect—then a flash—a great roar, not very far away—and the tent shook like a leaf in the wind. At the first sound of the raid, Bartrand had started, sitting upright in bed. The head nurse, helpless in the intense darkness and fearing to make him more restless by attempting to put him down, held him in her arms. Soon, says Modern Hospital, in relating the story, he began to call out orders, rapidly, precisely, like a man who was used to being obeyed, and then still louder, with more spirit, until his voice rang and reverberated through the open spaces of the tent. "Attention!—Alions, mes enfants!—En avant!"

From somewhere in the darkness the voice of the aid, a trifle shaky, said: "He thinks he's going over."

Another flash—another detonation—this time nearer. The head nurse felt something warm and wet soaking the front of her uniform. Then a silence—it seemed for ages. Finally Macdun, flashing on the light, called out: "They're gone, the beggars!"

He came over to the bed and gave one look at the burden the head nurse held in her arms. Then, taking off his hat, he held it, folded, in front of his coat.

"You can lay him down, miss. I think there's just work for me and the stretcher bearers now. The poor lad—he's gone west."

Mule Objected to Burden.

An observer attached to the First army had been up for several hours making notes on enemy infantry operations when he was suddenly attacked by a single-seat combat plane. The balloon crew on the ground immediately began to haul the big gas bag down, but the observer was running no chances and took to his parachute. This drifted well back of the lines and deposited him in the midst of a number of grazing army mules, and right astride one mule. The mule, not taking kindly to the sudden load forced on him, began to rear and plunge, starting quite a commotion among the herd, and the observer was rescued with difficulty from his precarious position.

Process Developed by War.

Making parabolic mirrors by chemical deposition on a glass mold is described as one of the war-quickened processes. A layer of silver was deposited chemically on a highly polished glass mirror, and was thickened electrolytically, after which it was given a sixteenth inch plating of copper and a suitable backing of strengthening material. Difference in expansion on heating gave a ready means of loosening the metal from the glass. The silver surface was given a waterproof and heatproof coating of lacquer, and was ready for use in much less time than would have been required for grinding and polishing a glass mirror.

American Chemical Products.

The interest in chemistry and chemical products has greatly increased in the United States owing to the fact that this country has been forced by the war to depend upon its own resources in this direction. The following uses are ascribed to these chemical products: In making soap and paper pulp, mercerizing cotton and purifying mineral oils, caustic soda is used; soda ash is necessary in the manufacture of soap and glass; silicate of soda (better known as water glass) is utilized in the manufacture of soap and in dyeing and printing calico, finishing cotton goods, preventing wood rot, bleaching jute and preserving eggs.

KICK'EM OFF, BABY!

DR. WILLIAM BRADY, who presides over the Medical Department of the Chicago Daily News, and writes articles for the Journal of the American Medical Association, from time to time, has this to say regarding Baby's comfort in warm weather.

"The meanest way to use a baby on a nice hot summer day is to dress him all up in pretty clothes. A young mother has enough instinct, if not enough sense, to undress the baby and let him cool off a bit. Then in swoops Mrs. F. 'Why, that baby will have colic, or summer complaint, or chorera infantum or pneumonia!' Then the poor little mother gets frightened and goes and puts on baby's haircloth shirt and woolen stockings. And the baby just has to grin and bear it the best he can.

"A baby stores up more heat per cubic inch of flesh than the most vigorous adult. When hot days come along the baby suffers more than any adult from the depressing, devitalizing influence of the heat. Indeed, plain warmth is the chief factor of the high mortality and morbidity rate among babies in hot weather, irrespective of food and sanitation. Therefore it is most essential that the baby, of all the household, should have every available opportunity to keep cool.

"Not only should he be undressed down to the diapers, or less, but he should be frequently watered with cold water; cooled water, not ice water. He needs comparatively more water to drink than the healthy adult, and there is no danger of giving him too much water."

Take a tip from Dr. William Brady—he knows!

You Will Find Here Everything BABY Needs

We pride ourselves on the completeness of our stock of Infants' Wear and Nursery Accessories. All fresh, up-to-date goods, intelligently selected and reasonably priced. Experienced, baby-wise women wait on you.

On every hand you will find suggestions that will contribute to baby's health and comfort. Vanta Baby Garments, endorsed by doctors, nurses and infant welfare experts—include Abdominal Binders, Teething Bands, Shirts, Gertrude Nighties, and Pinless Diapers. These and countless other baby comforts await your inspection in this department.

VANTA BABY GARMENTS ARE THE KIND THAT TIE WITH CUTE LITTLE BOWS OF TWISTLESS TAPE—NO PINS!—NO BUTTONS!

Fayetteville Flashes
FAYETTEVILLE, June 19.—Special.—The Greenback Auxiliary held an all day meeting at the home of Mrs. G. L. Workinger to finish up the work on hand. There were 20 adults and three children present and four visitors from Shedd—Mrs. Mary Porter, Mrs. Dora Shedd, Mrs. Ida Brasfield and Mrs. Morgason. The work

was finished and now they have 40 garments to turn into headquarters. The students who have been attending high school at Albany and Shedd are spending their vacation at home.

There were seven pupils passed from the 8th grade at the Greenback school. They were Russell Miller, Colin Carver, Elizabeth McBride, Lois

Painter, Wilda Barton, Florence Miller and Donald Davis.

Hillard and Hazel Ackerman of Brownsville motored over in their new Oldsmobile Wednesday and spent the day at the home of I. M. Saxton.

The cherrybirds and robins are making short work of the cherries. There surely will be none to market if they go unmolested.

PRINCE ALBERT

LAY your smoketaste flush up against a listening post—and you'll the Prince Albert call, all right! You'll hunt a jimmy pipe so quick and get so much tobacco joy out of every puff you'll wish you had been born twins! For, Prince Albert puts over a turn new to every man fond of a pipe or a home made cigarette. It wins your glad hand completely. That's because it has the quality!

And, right behind this quality flavor and quality fragrance is Prince Albert's freedom from bite and parch which is cut out by our exclusive patented process. We tell you to smoke your fill at any clip—jimmy pipe or makin' cigarette—without a comeback!

Toppy red bags, tidy red tins, handsome pound and half pound tin humidors—and that clever, practical pound crystal glass humidor with sponge moisture top that keeps the tobacco in such perfect condition
