Lumbering Has Good Outlook

According to one reputable authority the nation is 46 per cent underbuilt. The same authority believes that the prices of materials will rise at present levels for 1919. It also estimates total construction for 1919 at 40 to 60 per cent of normal with lumber as cheapest building material. Our country is liable to lose 6,000,000 alien laborers of whom 1,500,000 have gone or are going this year. This kind of labor is leaving New York at the rate of 1,000 a week, and the supply of labor for industries is scarce.

Lumbering in New York and many Eastern cities have less than one-third of a normal supply, and demand is increasing. Of a hundred brickyards in a famous Eastern clay products district, more than 70 are idle for lack of labor.

Indications are that scarcity of buildings will continue through 1920 and that the demand for lumber will continue to increase.

Falls From Bicycle

Wm. Patterson fell from his bicycle this noon at the corner of 4th and Lyon streets and sprained his leg.

Summer Comforts You Need Every Day

THE ADDED COMFORT you enjoy from being properly prepared for the hot days is well worth while. To aid you in selecting the articles you need we have arranged a special showing of Hot Weather Comforts—come and see them soon.

HIGH COSTS WILL REMAIN LONG TIME

Philadelphia Board of Trade Compiles Figures to Show Increases

PHILADELPHIA, July 30.—A. P. Correspondence.—The cost of living is likely to stay high for a long time to come in the opinion of the Philadelphia Board of Trade. This view is a result of a compilation of statistics from many lines of trade and industry.

According to these figures the advance in prices in this country since 1914 has been about 107 per cent, in Canada 115 per cent; Great Britain 133 per cent and France 235 per cent. It is pointed out that, in spite of material reductions in the price of steel, the advance in other commodities since the armistice has been so great that the average price schedules have been reduced but 5.7 per cent below prices prevailing October 1, 1918.

The following are given as reasons why wages will not be much less for a considerable period of time: Practical stoppage of immigration since 1914, depriving this country of several millions of workers who would normally have come to us and thus have relieved the labor shortage which confronts American industry upon the resumption of capacity operations.

Retention in the government military service of nearly 2,000,000 workers which, it is declared will doubtless continue an indefinite period.

Creation of new industries such as shipbuilding, manufacture of chemicals and dyes. Urgent demand for building and construction of every class due to their having been forcibly held back for several years.

Shortage of world food supplies and uniformly high prices.

Proportionately higher levels of commodity prices existing throughout Europe.

"See here," says the Good Judge

I want to remind you about that small chew of this good tobacco.

It tastes better because it's good tobacco. Its quality saves you part of your tobacco money. It goes further and lasts longer.

THE REAL TOBACCO CHEW
