REASONABLE INVESTMENT Don't buy a truck that will depreciate too rapidly to be economical. You really rent a motor truck when you buy it. At the end of its period of use it should have a substantial "Cash or trade-in" value. Investigate the actual "after use" worth of any truck before you make your selection.

ECONOMICAL OPERATION Trucks are a means of economy. It is not an investment to buy the truck that will increase your transportation costs. Find out what it will actually cost you to transport your merchandise.

SIMPLICITY Skilled experienced labor costs money. You don't want to increase your labor hire because of your truck investment. Before making your choice, take any worker in your delivery department. Give him a few simple instructions. See whether or not the truck is simple enough for his unskilled abilities.

EQUALIZED BALANCE From front fender to rear lamp bracket, maximum efficiency of operation requires even distribution of weight, work and wear. The motor must not be too light for its load—the frame must not be heavier than is necessary. Consider whether or not there is proper co-relation of size and parts.

Ten Points to Settle Before You Buy Any Truck

The Motor Truck is established. Its utility is no longer questioned. As a means of transportation it is definitely established that a motor truck is incomparably economical, convenient, etc. So it is not a question of whether or not you need a motor truck.

REASONABLE INVESTMENT Don't buy a truck that will depreciate too rapidly to be economical. You really rent a motor truck when you buy it. At the end of its period of use it should have a substantial "Cash or trade-in" value. Investigate the actual "after use" worth of any truck before you make your selection.

ECONOMICAL OPERATION Trucks are a means of economy. It is not an investment to buy the truck that will increase your transportation costs. Find out what it will actually cost you to transport your merchandise.

SIMPLICITY Skilled experienced labor costs money. You don't want to increase your labor hire because of your truck investment. Before making your choice, take any worker in your delivery department. Give him a few simple instructions. See whether or not the truck is simple enough for his unskilled abilities.

EQUALIZED BALANCE From front fender to rear lamp bracket, maximum efficiency of operation requires even distribution of weight, work and wear. TEST 10

OVER CARRIAGE Do not buy a one-ton truck and expect it to do a 3-1/2 ton duty. But the truck you do buy should be built to allow for a reasonable margin of overload. Buy the truck that your business needs. Do not invest in a 5 ton truck for a 1 ton load. Nor should you buy a 3-1/2 ton truck to do the work of a 5 ton truck.

CONTINUOUS OPERATION Accidents will happen, and some repairs are inevitable. Select a truck of a design so standardized that repairs will never keep your truck out of service.

ESTABLISHED MANUFACTURER A truck made by a maker having limited resources is a questionable investment. Be sure the maker of your truck will be in business as long as you do.

DEALER DEPENDABILITY The dealer is the agency that is directly responsible to you. Be sure that the dealer from whom you buy your truck is as reliable and dependable as your own banker. Do not buy a truck from a dealer that has a reputation for shifting responsibility.

NON RADICAL DESIGN Radical changes and principles are experimental. Do not buy an experimental truck. Keep within approved design and principle.

SPEED POWER An emergency will arise where you will have to run your fully-loaded truck at its maximum speed. Power should provide for speed—to allow for speed when it is necessary.

"THE TEN-TEST TRUCK" Has measured up to every test. Let us give you the facts to prove it.
