THE CHURCH GARAGE

One church has solved part of its financial problems by using the unoccupied part of its lot as a garage. On Sundays the church parking space is filled with cars driven by members of its congregation and of a church nearby. The charge to each car is small, but it assures the owner that a trustworthy person will keep his eye on it, so robes and other things may be left in it safely. And as a means of income to the church, the addition of these small sums makes a tidy amount.

It is a long time since each church had a shed back of it, as a matter of course, for the hitching of the horse that drew the family surrey or phaeton. Many churches are so built as to have no extra space for this purpose. But it is quite a common thing nowadays for a church to buy a building lot suitable for the large church of the future, and to erect for present purposes a small building which may later be moved to the rear and serve for Sunday School, community rooms and offices. This leaves a large yard much of which might very well be set aside for the parking of vehicles during service hours.

A church anywhere near the center of community life would undoubtedly find its "garage" a paying business during the week as well as on Sunday. In all but the smallest of rural villages parking space is difficult to find whenever there is anything to draw people to town. Shoppers, businessmen, farmers, would be glad to avail themselves of the privilege. One person in charge to check the cars and see that unauthorized persons had no access to them would suffice to run it.

The church bazaar, the church benefit of any sort, is always a bad means of support. The labor used in getting it up offsets the money raised. Such methods as this of the garage, utilizing the church's resources in a businesslike manner to bring in a definite, businesslike income, will do much to make the church respected

by people who now have no patience with its financing.

## CHURCH NOTICES

**LADIES:** When irregular or delayed use Triumph Pills. Safe and always dependable. Not sold at drugstores. Do not experiment with others, save disappointment. Write for "Relief" and particulars, it's free. ADDRESS: National Medical Institute, Milwaukee, Wis.

**Jump from Bed in Morning and Drink Hot Water**

Tells why everyone should drink hot water each morning before breakfast.

Why is man and woman, half the time, feeling nervous, despondent, worried; some days headachy, dull and unstrung; some days really incapacitated by illness?

If we all would practice inside-bathing, what a gratifying change would take place. Instead of thousands of half-sick, anaemic-looking souls with pasty, muddy complexions we should see crowds of happy, healthy, rosy-cheeked people everywhere. The reason is that the human system does not rid itself each day of all the waste which it accumulates under our present mode of living. For every ounce of food and drink taken into the system nearly an ounce of waste material must be carried out, else it ferments and forms ptomaine-like poisons which are absorbed into the blood.

Just as necessary as it is to clean the ashes from the furnace each day, before the fire will burn bright and hot, so we must each morning clear the inside organs of the previous day's accumulation of indigestible waste and body toxins. Men and women, whether sick or well, are advised to drink each morning, before breakfast, a glass of real hot water with a teaspoonful of limestone phosphate in it, as a harmless means of washing out of the stomach, liver, kidneys and bowels the indigestible material, waste, sour bile and toxins; thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach.

Millions of people who had their turn at constipation, bilious attacks, acid stomach, nervous days and sleepless nights have become real cranks about the morning inside-bath. A quarter pound of limestone phosphate will not cost much at the drug store, but is sufficient to demonstrate to anyone its cleansing, sweetening and freshening effect upon the system.

**W. P. Chilcote's WORK SHOP**

General Iron and Woodwork

**Our Repair Policy**

Recharging, repairs, testing—these are part of our service. We have the training and equipment to do this work well, at the least price consistent with good work.

Cheap work isn't really cheap at any price, and would only lose us customers.

But we regard this service as a part of our obligation to make Willard Batteries last as long as possible at least expense.

Another of our obligations is to distribute for Willard a battery that will last longer and doesn't need so many repairs—the Willard Battery with Threaded Rubber Insulation.

It gives longer life with fewer troubles just as a cord tire does.

Drop in and let us tell you its remarkable performance record after over four years of service.
