PACKING PLANT READY FOR HUGE BUSINESS AFTER BEING REBUILT

Capacity of Nebergall Linnore Brand House is Amazing; Auxiliary Units Will Handle By-products.

TO MAKE FERTILIZER

Dry Tankage to be Put Out; Cold Storage Plant of 7 Departments Holding Great Quantity Ready.

A modern plant which will handle all the stock raised in this section is nearing completion in the Nebergall Packing Plant east of Albany.

Sixty hogs per hour, 50 cattle a day, all the poultry that can be furnished, all the sheep, goats and other stock that can be raised, these statements show something of the capacity of the Linnore Brand plant which is just now beginning operations on a large scale after the disastrous fire of a few months ago which destroyed the former plant.

Business totaling a million to a million and a half dollars per annum will be handled. The entire Pacific coast will be the market.

At present about 20 men are employed. When all equipment is installed, about 75 workers will be needed. A cold storage plant and a fertilizer plant are parts of the whole organization. In the cold storage plant alone one room will hold 300 hogs and 100 cattle. And there are seven separate coolers or rooms in the cold-storage unit. The fertilizer department will dry all tankage and convert it into fertilizer. This will make available to farmers a rich dressing heretofore brought in from other cities.

Efficient machinery of the latest pattern is installed in every department. The hog scraper, for example, scrapes a hog a minute in a fashion defying the old slow hand method.

Besides handling stock ready to kill, complete arrangements for feeding and fattening stock in all shapes is being built. About 130 feeder cattle are now in the cattle yards fattening. Silos have been built, and filled with corn. Hogs are being fattened. The farmer can dispose of his stock at any time, and the Nebergall plant can care for it and turn it out as a marketable product.

There are four floors. Dozens of rooms—pickling room, sausage kitchen, etc.—are now ready. All the stock offered is being bought.

Prince Gazes at N.Y. Skyscrapers

This closeup of the Prince of Wales just after landing in New York at the Battery shows him looking up at the White Hall Building. From this point to the City Hall where he was officially received by Mayor Hylan, the eyes of the Prince were almost constantly fixed upon New York skyline, his first glimpse of which he received while crossing the Hudson river on the United States destroyer. The route from Pier A carried the Prince within view of the Woolworth tower. The Royal visitor will remain in New York until Saturday, when he will leave for Halifax, N. S. TECHNICALLY U. S. IS IN SAME POSITION AS AT CLOSE OF WAR

Senate Fails to Ratify Treaty on Three Decisive Votes; Lodge Says Definite Answer Given President.

MAY DECLARE PEACE

Senate Adjourns After Rejecting Lodge Reservations With Pact, and Pact Without Lodge Reservations.

WASHINGTON, Nov. 20.—By Associated Press—Technically peace is no nearer between the United States and Germany than it was on Armistice Day, over a year ago.

Late yesterday the senate, in three decisive votes, failed to ratify the treaty, adjourned and went home. Whether or not the treaty will come up at the next session is problematical. Sen. Lodge and his republican machine will pass an enactment simply declaring a state of peace with Germany, without the President's signature.

The inability of the President and the senate to come together was remarkable and not fully realized until the last moment. The first vote was on a resolution to ratify with the foreign relations committee's formidable list of "nullifying" reservations. It lost. The next reservationists in Sen. McNary's group voted against these reservations in order to give the democrats a chance to come to some compromise.

This they did not do. Acting on the President's word yesterday to Sen. Hitchcock, they held out. After several hours of democratic attempts to win over McNary's group, the second vote on the same resolution showed similar results.

The third vote was on a motion to ratify the pact as it was submitted by the President. It was defeated overwhelmingly.

Tenator Lodge declared this was conclusive answer to the President. He places the blame upon Wilson's stubbornness. Mr. Wilson places the blame upon Sen. Lodge for refusing to take the treaty as negotiated.

Although not changing technically the existing relations between the United States and Germany, the senate failure to ratify the peace treaty at the special session is expected by administration officials and diplomats here to have an indirect result of some importance on steps now being taken to restore a basis of world peace.

One of the first consequences is likely to be a hastening of negotiations at Paris to restore full commercial and diplomatic relations between Germany and the powers which have ratified the treaty.

Wilson is Silent WASHINGTON, Nov. 20.—President Wilson will have no statement to make on the failure of the senate to ratify the peace treaty, it was said today at the White House.

French Disappointed PARIS, Nov. 20.—Adjournment of the U. S. senate without ratification of the peace treaty created much surprise here in peace conference circles. Washington dispatches had suggested that some compromise was likely.

COAL SUPPLY DIMINISHING

CHICAGO, Nov. 20.—A. P.—Regional directors of railroads today had a free hand in dealing with curtailment of unessential industries and unnecessary passenger traffic.
