HAMMOND LBR. CO. IS LARGE

One of Company's Largest Mills Located Near Albany; Local Yards

One of the Large manufacturers of lumber on the Pacific Coast is the Hammond Lumber Company, who maintain a retail yard in this city. And one of the company's three mills is located at Mill City, 36 miles east of Albany on the Southern Pacific R. R. This plant has a capacity of 250,000 feet of lumber per day, and employs from 500 to 700 men in mill and woods.

J. R. Shaw is manager of the Mill City plant and has developed the largest payroll in this district. The local yard of this company proves a great convenience to the building trade of this vicinity, as they carry all kinds of building material except hardware, viz, lumber, lath shingles and roofing materials, lime, plaster, cement, hearth tile and mantle brick, sewer pipe and drain tile. From six to ten men are employed in the yard at Albany, and the company as a whole is responsible for much of the prosperity of the local merchants, as many employees of the mill and camps come to Albany to do most of their trading.

CREAM FOR CATARRH OPENS UP NOSTRILS
Tells How To Get Quick Relief from Head-Colds. It's Splendid!

In one minute your clogged nostrils will open, the air passages of your head will clear and you can breathe freely. No more hawking, snuffing, blowing, headache, dryness. No struggling for breath at night, your cold or catarrh will be gone.

Get a small bottle of Ely's Cream Balm from your druggist now. Apply a little of this fragrant, antiseptic, healing cream in your nostrils. It penetrates through every air passage of the head, soothes the inflamed or swollen mucous membrane and relief comes instantly.

It's just fine. Don't stay stuffed-up with a cold or nasty catarrh—Relief comes so quickly.

Hopes Women Will Adopt This Habit As Well As Men

Glass of hot water each morning helps us look and feel clean, sweet, fresh.

Happy, bright, alert—vigorous and vivacious—a good clear skin; a natural, rosy complexion and freedom from illness are assured only by clean, healthy blood. If only every woman and likewise every man could realize the wonders of the morning inside bath, what a gratifying change would take place.

Instead of the thousands of sickly, anemic-looking men, women and girls with pasty or muddy complexions; instead of the multitudes of "nerve wrecks," "rundowns," "brain fags" and pessimists we should see a virile, optimistic throng of rosy-cheeked people everywhere.

An inside bath is had by drinking, each morning before breakfast, a glass of real hot water with a teaspoonful of limestone phosphate in it to wash from the stomach, liver, kidneys and ten yards of bowels the previous day's indigestible waste, sour fermentations and poisons, thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach.

Those subject to sick headaches, biliousness, nasty breath, rheumatism, colds; and particularly those who have a pallid, sallow complexion and who are constipated very often, are urged to obtain a quarter pound of limestone phosphate at the drug store which will cost but a trifle but is sufficient to demonstrate the quick and remarkable change in both health and appearance awaiting those who practice internal sanitation. We must remember that inside cleanliness is more important than outside, because the skin does not absorb impurities to contaminate the blood, while the pores in the thirty feet of bowels do.

WILLAMETTE VALLEY CLIMATE IS IDEAL FOR GENERAL LIVING AND HEALTH CONDITIONS AND FARMING

No country in the world can boast of a finer climate, taking everything into consideration, than that found in the Willamette Valley. The temperature is mild, the thermometer having gone below zero but three times in the last 40 years. Seldom does the temperature register less than 15 degrees above, and Oregonians think that it is a cold winter when it does get this cold.

The present winter is one of the freaks that visit the valley once in decade or two, and when the thermometer went down to 15 degrees below zero last month it came within one degree of breaking the coldest mark on record, which occurred in 1871. In 1884 the mercury went down to 5 degrees below zero, in January, 1909 it reached 3 below and in December 1919 it went 15 below.

The snow record was also broken this winter when a total of 25.5 inches fell at one stretch. In 1916 the total was 32.25 inches, but it was distributed through four different months. Usually there is not enough snow here to grease the skids of a bob-sled and sleighs and sleds are almost a minus article.

Following is a summary of the snowfall for the last 10 years, showing that the yearly average is 9.67 inches, as compiled by F. M. French, local U. S. weather observer.

January, 1910—2.00 inches
February, 1910—2.00 inches
January, 1911—8.50 inches
April, 1911—3.00 inches
November, 1911—0.25 inches
December, 1912—0.25 inches
January, 1913—7.50 inches
January, 1914—2.50 inches
December, 1914—1.50 inches
January, 1916—24.00 inches
February, 1916—2.50 inches
March, 1916—2.75 inches.

December, 1916—3.00 inches.
January, 1917—0.50 inches.
February, 1917—11.25 inches.
March, 1917—0.25 inches.
February, 1918—1.00 inches.
March, 1918—0.50 inches.
December, 1919—25.50 inches.

Floods are seldom encountered in the Willamette Valley, and when they do come only the low lands are affected. The following information supplied by Weather Observer French shows the maximum stage of the river at the highest points on record:

1861, 36.0 feet above low water mark. The stage of the river is measured from the low water mark of 1861 when local observations were begun, and strangely enough, the winter of this year saw also the highest mark on record. In 1881 the river reached the 32.8 foot mark; 1890, 33.9 ft.; 1901, 30.5 ft.; 1903, 31.5; 1907, 30.8; 1909, 31.0; 1915, 5.7 and 1919, 20.0 ft.

The average annual rainfall for the last 10 years was 41.29 inches, a decrease of 1.60 inches in the annual fall for the 30 years prior to 1910. The abundance of rain, well distributed throughout the year, is the keynote to the success of the Willamette Valley as an agricultural, fruit and stock raising section. Through the courtesy of F. M. French the accompanying table, showing the precipitation by months of the last 10 years, shows how evenly the moisture is distributed throughout the year. The really wet months are usually said to be March and April, with considerable rain in November and September. The rainfall during the other months of the year is generally so well spread out that it is hardly noticed.

Following is the table as prepared by Mr. French for Democrat readers:

Month	1910	1911	1912	1913	1914	1915	1916	1917	1918	1919	10 year average
Jan.	6.54	10.68	9.29	5.69	11.76	5.67	6.03	3.20	6.37	10.14	7.53
Feb.	6.82	2.88	4.97	1.35	4.71	3.30	6.84	4.08	7.55	9.55	5.20
March	1.63	.86	3.01	5.34	2.94	2.21	10.44	4.74	3.47	6.22	4.08
April	1.89	2.70	2.37	2.45	3.81	1.90	2.77	4.97	1.23	4.08	2.81
May	1.75	2.85	2.71	2.12	1.83	3.84	2.57	1.81	1.19	1.90	2.25
June	1.16	.77	3.18	3.37	2.07	.79	1.02	.89	.02	.28	1.35
July	.00	.16	.58	.55	.02	1.28	3.31	.00	.61	.17	.66
Aug.	.08	.00	2.93	.50	.00	.00	.36	.00	.60	.03	.45
Sept.	1.22	4.23	2.64	1.72	3.76	.80	.72	1.55	.55	3.12	2.02
Oct.	2.64	1.23	2.89	3.65	5.43	1.58	1.25	.03	3.86	3.02	2.55
Nov.	10.68	3.35	6.51	5.70	4.69	10.24	7.45	4.39	5.26	7.69	6.59
Dec.	3.89	4.40	5.39	3.00	3.22	8.51	4.98	13.84	3.60	6.64	5.74
Totals	38.30	34.11	46.37	35.44	44.24	40.12	47.74	39.50	34.31	52.84	41.29

ALBANY PRODUCT IS WELL KNOWN

Albany Iron Works Has Reputation for High Grade Work

An Albany man who is always busy is F. J. Miller, president of The Albany Chamber of Commerce, who, plans still bigger things for Albany during the year 1920, in the way of enlarging the plant of The Albany Iron Works, by adding new machinery as well as new building.

The first hold Mr. Miller took of manufacturing in Albany was back in 1893 when he bought an interest in the old Cherry & Park plant, later buying all its stock thus becoming the sole owner of the present Albany Iron Works.

This plant is now specializing in the manufacture of road building machines gravel plants, drag line scrapers, serial bucket conveyers, road scarifiers, and is now engaged in manufacturing the iron parts for logging cars for a Southern Oregon company. They also have just contracted for the building of twenty-five street paving re-

pair outfits.

In a short interview yesterday, Mr. Miller said that he will add new machinery and new buildings to his already extensive plant at the beginning of the New Year.

The Albany Iron Works employs now about 25 men most of them being skilled mechanics, and their products can be found up and down the coast, from north to south.

The monthly pay roll of the plant now averaged is from \$3,000 to \$4,000, distributed every month in Albany.

Besides being prominent in business and social circles in Albany, Mr. Miller is not unknown in the political game of the state, having been first appointed railroad commissioner by ex-Governor Oswald West in 1909 was elected to the same position in 1910.

In 1907 Mr. Miller was elected joint senator from Marion and Linn counties, and in 1909 was elected joint senator from Linn and Lane counties, and was serving in the legislature when he was appointed railroad commissioner.

During the last four years' of his service, Mr. Miller was chairman of the state board of Railroad Commissioners. He is also a Past Grand Master of the Masonic Lodge A. F. and A. M.
