## Smudge Saved Five Cars Apples

"Crude oil and alfalfa made the smudge that kept five cars of the Oaco apples from freezing during the cold spell," said Packer Edward Snow while in this city from Monroe on Monday.

"I happened to be on duty at the packing house the first night of the big freeze, saw the thermometer drop twentytwo degrees in one hour, and then I got busy mighty quickly. For three nights we kept up a smudge in that packing house so thick that you could cut it up in chunks, but it kept an even temperature, say at about thirty degrees, and we didn't even lose a cull. We are shipping out the last car today. I never heard of an oil-alfalfa smudge before, but it did the work," said Snow, and he may take out a patent.—Gazette-Times.

### CENSUS ENUMERATORS—

A. D. Leach of Salem passed through Albany today of Detroit where he is to begin taking the census enumeration tomorrow. The enumerators receive \$6.00 per day for the work. One enumerator to take the census in several precincts.

Model K-50

## Buick Sedan for Seven

THE BUICK Model K-Six-50 four-door Sedan is the latest development in closed car design. The front seat, instead of being divided, is full width, giving additional roominess to passengers and providing an extra brace to the body which adds considerably to its stability.

The latest type of cowl and side lamps, tilting steering wheel and satin finished interior trimmings are featured in this Sedan. The lining is done in rich plush, without binding. Altered lines and low-hung body give added grace to the exterior without sacrificing head-room. The main compartment accommodates two disappearing seats, which are built for genuine comfort.

Silk shades on rollers afford privacy or shut out a too ardent sun. Ventilation is controlled by the adjustable windows and windshield, the door windows being fitted with patent handles for raising or lowering them. Suitable lights give interior illumination. Lowered seats give greater riding comfort.
