EXPERT WORKERS IN DEMAND

Great Need for Those Who Are Capable and Willing to Do Special Tasks.

"What we need in this country is expert workers," says a woman who makes smart hats for smart people and who says business would be very good if she could get people to work for her. "I hear it all along the line," she continued. "They say there is a great need of employment, but it can't be so, for people don't want to work. I want expert finishers and I can't get them. An advertisement won't bring them. It won't bring anyone. They won't even come to see what you are willing to pay for them. Where are they? I don't know. Perhaps the girls prefer to ride up and down in elevators."

"There were some I knew who went during the war to work on gas masks, but they can't be doing that now, and I don't know where they are. They made good money, and perhaps they are still spending it. I want some models that I am having made in New York, but I have been waiting weeks and I can't get them. I suppose the others are having the same trouble that I am. I talked with a jeweler the other day and he told me he could use twenty expert workmen if he could get them. He can't do it. He has found one old man, and that is the best he can do. What are we going to do? People don't want to do any careful, expert work. They want to do something that is quick and easy and make money doing it."—Brooklyn Eagle.

JAP WOMEN DEMAND MUCH

Their Ideal Man Would Have to Be Something Above the Ordinary Run of Humanity.

The Japanese magazine Chouquovo Gohano (virtuous woman) invited its Japanese women readers to send in their opinions on what constitutes an ideal husband. Here are the thirteen virtues they demanded of a Jap hubby:

He should not be greedy.

He should not spend too much time "priming."

He should have a manly appearance.

He should not be too familiar with other women.

He should express himself clearly.

He should make prompt decisions.

He should have high ideals.

He should never show himself in the kitchen.

He should never criticize the coiffure or the gowns of his wife or any other women.

He should not bore his wife by telling her all his pet tastes.

He should not drink too much.

He should not be a dude.

He should not be too jealous.

The symposium aroused the humor of the Japanese males, who sent in some suggestions of what constitutes an ideal wife. They paraphrased the last of the thirteen points and all agreed that "she should not be too jealous."

The Russian people believe it unlucky to start on a journey on either a Monday or a Friday.
