

Let's See, How old is William now?

Is he at the age where a hair cut is a calamity or are his teens weighing so heavy on his hands that a shave is nearly a necessity?

Is he spending more time at ride chasing than at his music lesson or does his dignity of late long for a crooked stem pipe and a pair like Fathers? This store is interested in your son's growth so much that we watch every step and keep in tune with the proper clothes.

A big part of our business is dressing boys from 6 up—and even at 21 we don't let up but go right on and up to 30 and then we stop, for our customers never look any older—no matter how old they get.

Everything for dressing a boy and his Dad—and his Grandfather. And everything in the house is of the best we know how to buy.

Your Collar Button

It is such a little thing and usually seems too trifling to worry about.

But it's the little things that count and there is more real comfort and satisfaction in a good collar button than in some articles of apparel. We sell—

KREMENTZ
warrented gold collar buttons, links, etc. They are made for service. Keep an extra on hand and save time in hunting for the other one you drop.

The collar button is but a symbol of the pains which we take in our entire business. It is the attention to the little things which brings us customers when they want silver, plate, clocks, watches, rings, etc.

WILL'S DIAMONDS

are superb. A choice collection, carefully chosen from the finest stocks. Pure, perfectly cut, brilliant.

We invite you to look them over.

Grange Says Go to Work

Sherman J. Lowell, master of National Grange, delivered a telling blow when he recently said: "In the reconstruction, everyone must get ready to actually work again, to save again and to a considerable degree to get back to thrift, sanity and common sense, or accept as permanent the present scale of living costs in which event we might just as well stop ranting about the high cost of living and realize that a new basis of economic procedure is here to stay." Complaining about conditions without really trying to co-operate in remedying conditions is not much more sensible than crying for the moon.
