If you have Business Out of town

every little while, you haven't any business buying an Overcoat that won't look well a long time.
 Of course, when you are home here, we all know you are a solid citizen and a stock holder at the First National but in other climes your assets are judged by appearance.
 This isn't any argument why you shouldn't have a splendid big coat to wear around home—but it is a first rate reason why you should look the part when you travel.
 Value First Overcoats at \$35.00 to \$50.00
 answer both purposes and the values we are showing at the above mentioned prices is why our salesmen seldom get a chance to read The Saturday Evening Post on Thursday.

 Abnormal as is the alliance of a believer with an unbeliever, such marriages sometimes, in fact too often do occur. Robbed of both sacramental rite and grace, they possess however a rabid and binding force for life, but the priest officiates at them rather in the name of the state than in the name of the church. He must first ascertain however that there are no mental reservations on the part of the unbeliever as to the bona fide pledge which goes with every marriage and the promise to have all the children baptized in infancy. In fairness to all concerned, the legislation of the Church on this subject will be fully stated.

MACK PERFORMANCE COUNTS

Make Your 1920 Truck A MACK

You will Earn and Save by Doing so

A good motor truck is the means of earning money but it must be a high-grade, thoroughly engineered and manufactured truck.

That is because it will do you no good to earn money through the operation of a truck and then have to spend all you make (and probably more too) in order to keep the truck running.

At this time you probably are thinking about how to increase your business during 1920. You must have a truck or you must have another one. Upon that you have decided.

Then it becomes a question of selection. You should buy a truck as you would make an investment of any other type. Knowing your needs, the choice should not be difficult.

MACK trucks are recognized as the standard of heavy-duty transportation. There is a size that is right for your needs. We would appreciate an opportunity to tell you about MACK trucks.

Price and Value

A suit of clothes can cost too much or too little. No possible combination of materials and workmanship can justify \$200 for a business suit.

Motor Trucks can cost too much or too little. There is a happy medium—a point where service and price balance—a middle ground where value is greatest.

The limited market for the high priced truck means a small production, high overhead; necessitates a wide margin of profit, an inflated market price. The motor truck built down to a price is an expensive investment. Too many hours in the repair shop, high upkeep, short life, quick depreciation, low resale value.

Bethlehem Motor Trucks are not built down to meet a price or up to justify a price. They represent the right economic combination of proper price and proper value. Buy your Motor Truck on Facts.
