Fordson

TRADE MARK

Farm Tractor

When Henry Ford set about building the Fordson tractor, he had a thorough understanding of just what it should be and what it should do. His early life on the farm gave him a deep insight into the daily life of the farmer; his mechanical genius saw the type of tractor needed. And for more than twelve years he experimented over more than 7,000 acres of land in different kinds of soil, with different crops.

So he built the Fordson. It is so simple that a schoolboy can operate it. It is low in first cost. It is lowest in operating cost and Fordson parts and Fordson service are always to be had promptly from the dealer.

The Fordson is a profitable investment. It can be used every working day in the year. It is an inexpensive power plant and it will lighten your work.

Don't delay ordering your Fordson tractor. The demand is greater than the supply.

Made by Henry Ford & Son and sold by

Kirk McKern Motor Co.
