That describes the month of March. Satisfaction anticipated, expectations realized, that describes the experience of our new patrons. Of course, it's a habit with our old customers.

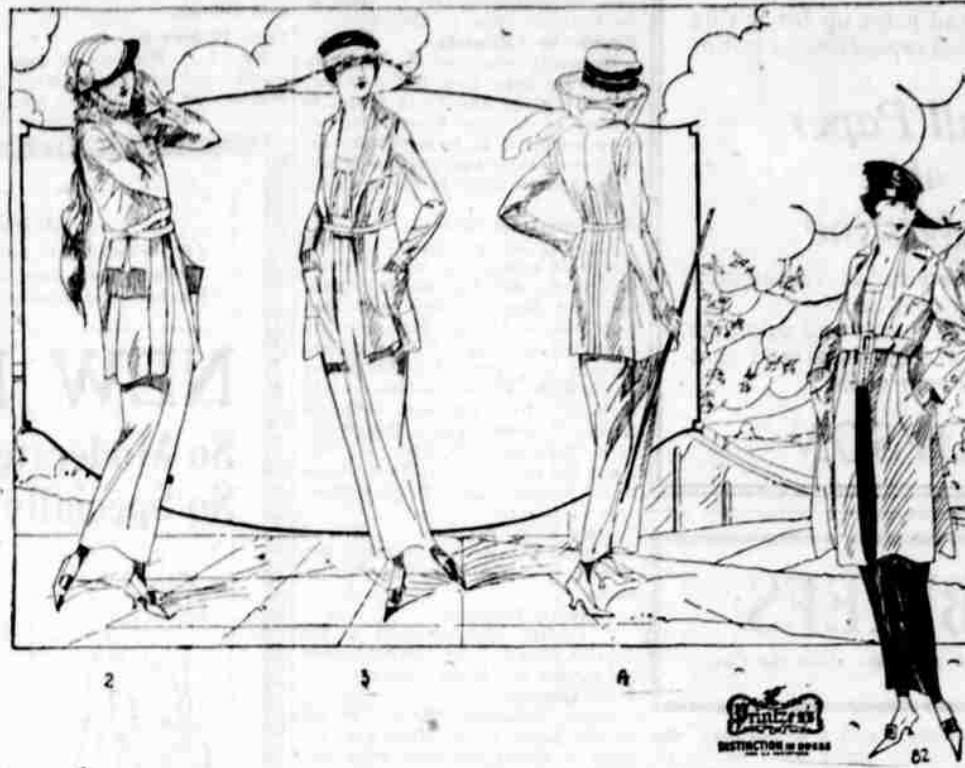

The Vogue for Luster-Bright Effects in Millinery

Everything in millinery seems to be lacquered or shellacked, for gloss and shine and glitter rule in the millinery realm.

Cellophane is a real discovery in this class of luster-bright materials. It comes in the most entrancing colors and attractive forms such as fringe, bands, strands and other novelties. Hand made fabric hats are so really lovely that they are a big feature. They are being made of shiny satin, taffeta, and even gay colored voiles.

Our millinery department is surely one of the bright spots of the town. Come and enjoy it—and well—maybe you better select your spring hat now. It's only the shortest little time until Easter you know—just 3 days.
