Fordson

TRADE MARK

Farm Tractor

More than one-third of the tractors in use in the United States are Fordsons, yet the Fordson has only been on the market two years. Just like the Ford car, the Fordson is an all-year utility. It is a compact tractor; it is easily operated, it has more power per pound weight than any other tractor manufactured, it is the lowest priced tractor and it is the most economical to operate.

There are more than seven thousand Fordson dealers in the United States. There is one in every community who not only sells Fordsons, but who carries a supply of Fordson parts for repairs and replacements with skilled mechanics to give dependable service, and to help the farmer get the best out of the Fordson tractor.

The demand for Fordson tractors is greater than the supply. There is only a limited number for each territory. Get your order in now. Orders are filled in the order received.

Made by Henry Ford & Son and sold by

Kirk McKern Motor Co.
