### BUILDS 33 MILES OF ROAD WITH ONLY \$500

Another Cottage Grove Man New York Sheriff Arrived To-Proves Marvel in Highway Construction.

A peer to Road Supervising Young, of the Bohemian district, who recently elated the county court when it discovered that he could build good mountain roads at \$500 a mile, has the been found. This one is "Mike" Kebblebeck, also of Cottage Grove, who has rebuilt 33 miles of mountain road for \$500, from Crowbar Point to the summit of the Cascade range on the old Military Willamette road. Several months ago he was given \$500 and told to distribute it as widely as possible over the 33 miles of road. The road was becoming almost impassible in many places; the amount of money was rediculously small.

Jack Maglardy, who returned with
the Kelly party over this road a few
days ago, yesterday reported the results of the \$500 improvement. He
declares that with six men this road
supervisor has made a splendid highway. Rocks have been blasted from
the road which for miles runs along
the steep cliff, with a bank on one
side and a precipice on the other.
Along the bank, he has ditched the
road for miles to prevent the water
running off on the outside, and cutting it narrower. He is very warm
in his praise of the present condition
of the road.

"This highway," said Mr. Maglardy, "is second in importance to the McKenzie road over the mountains. With the scenic lakes along the summit of this mountain reached by this route, and with the directions of this road to Crater Lake and the Klamath country, it is bound to become the attraction each year for thousands of tourists.

"If the same amount of money could be spent as judiciously on this road each year it would keep the highway in splendid condition. There are few steep grades, and with the proper surfacing this route over the mountains would become readly accessible to automobile traific. The work should be begun, though, earlier in the year."
