

MT. ANGEL TO PLAY BALL AT THIS CITY

Team is Declared to Be One of Strongest in Willamette Valley This Year.

TOMORROW'S CONTEST WILL BE BEST OF THE SEASON

Bigbee and Patterson Will Be On the Mound for Local Aggregation.

The fast Mt. Angel ball team, with an enviable record, will come to Albany tomorrow and at 3 o'clock in the afternoon will cross bats with the Albany Athletics at the local park. Their ability is well known by the baseball fans of this city and the hardest game of the season is promised, a game even better than the two games that were played here Thursday when the Athletics won both contests with the Knights of Columbus team of Portland.

Now, to witness a better game than those of Thursday sounds unreasonable, but the fans all predict the hardest fought game of the season tomorrow and indications today are that a record Sunday crowd will attend the game.

Mt. Angel is considered to be one of the strongest amateur organizations in the state. Schaubach will leave the ball for Mt. Angel with White on the receiving end and the Albany battery will be Bigbee-Patterson and Patterson. Following is the lineup of the teams:

ALBANY POLICE STOP REPRODUCTION OF WOLGAST-RIVERS FIGHT TODAY

Tom Young, a local painter, and H. A. Shepherd who formerly worked for Young, became "peevish" at each other this morning and after several minutes of shouting aggravating phrases at each other, they "mixed" in front of Young's shop on Ferry street and were giving an excellent reproduction of the Wolgast-Rivers fight, when both were arrested by Special Officer Ries who happened along the street while the first round was in progress.

They were arraigned before Police Judge Van Tassel who fined them each \$5 and costs for their sparring exhibition, after both had plead guilty to the charge. It is alleged that the fight resulted over money matters.

OLD WELL NEAR FREIGHT DEPOT STOPS GRADING OPERATIONS FOR A TIME

While excavating yesterday on the south side of the Oregon Electric depot, workmen uncovered an old well which was twenty feet deep and six feet in diameter. The well had evidently not been in use for many years and when abandoned had been covered over and dirt threw on top of it, hiding it from view. The well was walled up from top to bottom with brick which when investigated was found to be in perfect condition. The well which contained several feet of water was located directly in the center of the grade which is being constructed for storage tracks to the freight house and it was necessary to fill it up with dirt before operations of grading could be resumed.

W. H. Macneil, a prominent farmer residing northeast of Albany, went to Nashville this noon on a short business trip.

In mentioning the accident of X. W. Boom yesterday the Democrat unintentionally spelled the name wrong. It should have been Boom instead of Boone.

GRADING FOR WATER STREET LINE NEARING COMPLETION

Crew of Sixty Men Are Rushing Work for Freight Tracks of Oregon Electric.

Foreman E. Hutchinson and a crew of over 50 men are busily engaged on Water street grading for the tracks of the Oregon Electric freight line and expect to finish the work this evening. The rails on the freight line have already been laid from the main line at Burkhart Park west on Water street to Thurston and work will proceed west from Thurston as soon as the grade is completed.

Three switch tracks leave the main freight line at Thurston street, two of them going to the south side of the new freight depot for loading purposes and the third one is being constructed to the Watson iron foundry. On the north side of the freight depot the grading is nearly completed for one track and another track will be built later.

The O. E. and S. P. people will grade Water street together and will go clear through to the steel bridge regardless of any houses or buildings that may happen to be in the right-of-way.

A fine concrete bridge, the full width of the street, has been built by the electric company across the canal at Thurston street and substantial wooden bridges across the gulches lying between Cleveland and Vine streets have also been completed.

The crew of men working on Water street are quartered in fourteen cars standing on a side track near Madison street. The train consists of "bunk" cars, blacksmith cars and kitchen cars.

MISFITS. Contributed by F. P. Nutting.

Delivering a Portland paper in Albany at 6:30 p. m., printed in the afternoon, is certainly going some even these electric days. The O. E. does it.

There is talk of making a republic out of Turkey. That would beat putting wings on the devil.

An Austrian aviator recently went up 13,779 feet, with one passenger. That's high, but after all a fall of a hundred feet is just as fatal as one of nearly three miles.

The girl who learns to cook well by attending a domestic science course of demonstrations at Chautauqua, has gotten the worth of her money several hundred times. At least the fellow who marries her has.

A girl never looks prettier in the eye of a sensible man than when she is doing her duty washing dishes or doing some other necessary household duty.

The Chautauqua pond needs some kerosene oil before the coming good weather hatches the mosquitos.

Good order and no noise around the auditorium during any number, big or little, should be absolutely insisted on.

People who come here see big things ahead for Albany.

Albany now has forty registered trains a day. Other towns will do well to beat that before claiming to be the railroad center of the valley.

THANKS.

The Ladies of the G. A. R. wish to express their sincerest thanks for the ride through the streets of our city on the occasion of our recent glorious celebration. We have been informed that the Multa Machine company were the thoughtful ones who gave us and our friends such a rare treat.

Done by suggestion of the Ladies of G. A. R. D. TORRET, Commander McPherson Post.
