

# GRIZZLEY

## Grizzly Gold Mining Co.

CAPITAL \$500,000

in 1,000,000 shares of the par value of Fifty Cents Each. Treasury Stock 400,000 shares.

**FULL PAID AND NON-ASSESSABLE.**

### OFFICERS:

President, JNO. J. PENHALE,

(Gen. Mgr. Bunker Hill Gold Mining Co., Sumpter, Oregon.)

Vice-Pres., ALBERT GEISER,

(President Citizens Bank, Baker City.)

Treasurer, EUGENE SPERRY

Secretary, R. C. PENTLAND

### PROPERTY

The Grizzly group consists of the "Colorado" and the "Colorado Extension" quartz mineral claims, situated in the Sumpter District of Baker county, Oregon, six miles northwest of the town of Sumpter, forming part of the rich mineral zone wherein are located producing mines of fabulous wealth, such as the "North Pole," "Columbia," "Golconda," "Bonanza" etc., etc. Development work on

the Grizzly group has disclosed a gold bearing ledge of remarkably high value and there is every reason to expect the property will become one of the greatest mines in Oregon.

A limited amount of Treasury Stock is offered for sale at **SIX CENTS** per share. Subscriptions for stock may be sent to the First Bank of Sumpter, Sumpter, Ore.

For Prospectus and General Information address

**O. C. McLEOD & CO., Sumpter, Ore.**

#### SUNDAY CLOSING OF MINES.

##### As Much Work Can Be Done in Six as in Seven Days.

There is a decided agitation going on in various parts of the country over the question of six days for a week's work in mining camps, and the question is being solved along these lines. Experience is teaching the lesson that the miners can accomplish as much work in six days as they did previously in seven. Many mine operators in Butte, Montana, and Utah and some in Colorado are realizing the truth of this and are extending the six day rule much more generally than heretofore; so that it begins to appear that the seven day a week, thirty a month, and three hundred and sixty-five a year plan will pass into the realm of barbarism from which it sprang.

It is strange that mine operators have been so tardy in conforming their plan of action to what is now demonstrated to be scientifically imperative. It is a matter of proof that the French ten-day a week system was destructive to all the best interests of working, whether physical or moral, and it is incomprehensible that mining men should have clung so long to the system which allowed no day of rest either for man or animal.

Cripple Creek is today run on the three hundred sixty-five day a year plan, but what are the results? While no provision is made for the men's Sunday, it is found that they take their day of rest every thirty days or less, whenever pay day happens to come round. Mine managers have to take in account the loss of time occasioned by men going off on a "drunk" and the loss of time will be found to amount to close onto that which would be caused by the six day a week plan. And again it will be found a fact that the men will come back to work after days of rioting and drunkenness unfit for good work. It will also be found if the death rates

of the Cripple Creek district are examined that the mortality is much greater in that camp than prevails in any similar camp where the six day plan is in operation. It has been claimed by Cripple Creek mine owners that their men worked as well and lived as long under the present system as if the six day plan was in vogue. Such statements are contrary to common sense and in direct opposition to the scientific investigator and it will take more than the word of a selfish mine superintendent to establish such a claim. Cripple Creek, so far ahead in all matters of mining in general, is most lamentably deficient in this one great principle of conservation of human energy.—Mining Record.

#### Presbyterian Choir Concert.

The concert given last Thursday evening by the Presbyterian church choir was what the management promised it would be, a real musical treat. Where every number was worthy of special mention it is difficult, and perhaps seemingly invidious, to single out any one for commendation, without mentioning all. The two vocal solos, one by Mrs. E. Sadie White and the other by S. N. Steele, were highly appreciated by the audience, and both received hearty encores. Both have unusually fine voices, highly cultivated. Mrs. Swan, who carried a part in a duet and also in a quartet, has a charming voice, under perfect control, while Miss Carrie Spaulding sings as sweetly as a bird. The mandolin and guitar duet by Misses Anna and Stella Brooks was by some considered the instrumental hit of the evening.

#### Poured Coal Oil in the Well.

Some miscreant poured coal oil in a well on North Cracker street, which is used by all the neighborhood, Monday night. It is said that this will render the water unfit for drinking purposes for some time, possibly permanently. There is no neighborhood row in progress there and it is not known what motive prompted such a despicable, senseless act.

#### SCIENTIFIC PROSPECTING.

##### Applied in the Granite District With Rich Results.

C. C. Higgins and H. F. Anderson, of Salt Lake, ran across a stray copy of the Granite Boulder last February and concluded to come out here instead of going to Cape Nome. They got a camp outfit in Granite, struck out on the short cut towards the Bonanza, going about four miles before they got into country that hadn't all been located.

There they commenced panning a little gulch and followed it up until they couldn't get any more colors. Then they prospected around and found where the pay dirt ran up the side of the mountain. After following it up the side of the hill until it showed no more colors, they began trenching and soon uncovered the ledge which gave a string of gold: an inch and a half long in the pan. This encouraged them and they began sinking on the lode and now have several tons of milling ore on the dump.

The strike of the ledge is nearly north and south and the dip nearly perpendicular. It lies between porphyry on the hanging wall and a slate foot wall, showing about five feet wide near the surface, with indications of widening as they go down. The vein is a true contact, and the same kind of a proposition as made many a poor prospector rich in the early days of quartz mining here, where a ledge had to pay from the grass roots or the prospector could not follow it.

The property is called the Golden Fleece Consolidated, and we hear it rumored that Mr. Higgins will leave for Salt Lake next week to make arrangements for pushing development work on this valuable prospect.—Granite Boulder.

**FURNISHED ROOMS**—Over Post Office, neat and comfortably furnished rooms, single and en suite, with use of piano, four dollars per week and up. Mrs. J. Johnson.
