

# Grizzly Gold Mining Co.

## CAPITAL \$500,000

in 1,000,000 shares of the par value of Fifty Cents Each. Treasury Stock 400,000 shares.

**FULL PAID AND NON-ASSESSABLE.**

### OFFICERS:

President, JNO. J. PENHALE,  
(Gen. Mgr. Bunker Hill Gold Mining Co., Sumpter, Oregon.)

Vice-Pres., ALBERT GEISER,  
(President Citizens Bank, Baker City.)

Treasurer, EUGENE SPERRY  
Secretary, R. C. PENTLAND

### PROPERTY

The Grizzly group consists of the "Colorado" and the "Colorado Extension" quartz mineral claims, situated in the Sumpter District of Baker county, Oregon, six miles northwest of the town of Sumpter, forming part of the rich mineral zone wherein are located producing mines of fabulous wealth, such as the "North Pole," "Columbia," "Golconda," "Bonanza" etc., etc. Development work on

the Grizzly group has disclosed a gold bearing ledge of remarkably high value and there is every reason to expect the property will become one of the greatest mines in Oregon.

A limited amount of Treasury Stock is offered for sale at **SIX CENTS** per share. Subscriptions for stock may be sent to the First Bank of Sumpter, Sumpter, Ore.

For Prospectus and General Information address

**O. C. McLEOD & CO., Sumpter, Ore.**

### SUMPTER FOUNDRY.

#### One to Be Erected at Once On the Vinson Addition.

Saturday the deal was closed which insures for Sumpter a first class foundry and machine shops, a much needed institution here.

Ed Cannon, of the Electric Light and Power company, had much to do with engineering the deal. The company has been incorporated as the Sumpter Engineering and Foundry company, with a capital stock of \$25,000. The incorporators are Charles Freer, P. L. Muir and E. Cannon. The last named gentleman will be president; the first, secretary and treasurer, and P. L. Muir, manager. Mr. and Freer is a recent arrival from Montana has had a wide and successful experience in this line of work. P. L. Muir is a mechanical engineer by profession. Everybody knows all about Ed Cannon; among other things, that he is one of the best electricians in the Northwest.

Roy Miller has sold half of block No. 17 in the Vinson addition to the company, on which the plant will be built. This is the second block from the river, on the south side of Granite, facing that street. Work on the buildings will be commenced at once, and will be finished in about thirty days. The institution will be in operation in less than two months.

The machinery to be used is that now in a plant at Astoria, which Mr. Cannon has recently come into possession of through some business transaction. He says it is all of the best modern type, as good as new and cost originally considerably over \$10,000. It will be shipped here in a few days.

It is scarcely necessary to point out the

vast benefits which will accrue to Sumpter from the establishment here of such an institution. Its effect will be to still more firmly fix this as the mining center of eastern Oregon, because all the surrounding miners will then come here to have their machinery repaired, and no inconsiderable amount of it manufactured. Heretofore all of this work has passed through Sumpter and been taken to Baker City, where a good plant is in operation; or else sent to Portland. And such an establishment will be a financial success, too, for there is any quantity of such work done in the immediate vicinity of Sumpter.

#### Union County Copper Mines.

The mines in the copper district of Union county are making a splendid showing and gaining a reputation as the coming copper fields of the west. A. T. Vaughn, one of the locators of the now famous Vaughn mine in Union county, said a few days ago: "Never in the history of mining in eastern Oregon has there been such development in our copper belt, and so many good properties opened as are now shown along Snake river. We are interested in many properties for miles up and down the river. In tunnel No. 2 of the Iron Dyke, we uncovered the other day copper pyrites which go 12 1/2 per cent in copper and show good values in gold. The Gray Eagle, another property on a parallel ledge with the Iron Dyke was extensively developed during the past winter, and now shows tremendously rich copper pyrites and gold. We have had many good offers for this property, but believe that it is good enough to keep. The Great Hyland Boy mine, located at Bingham, Utah, owned by the Standard Oil company, runs but six and one-half to eight per cent in copper, with the same character of ore as ours."—Union Republican.

The City Green house, at Baker City, furnishes choice cut flowers.

#### Attempted Jail Break Foiled.

Officials connected with the sheriff's office have discovered and are now prepared to thwart a plan for a general delivery from the county jail in this city. Thursday afternoon suspicious action on the part of certain inmates of the jail aroused the attention of the deputies and a strict watch was immediately placed on all the prisoners, with the result that late Thursday evening one of the guards stationed on the south side of the court house discovered the prisoners actively engaged in sawing the steel bars which protect the corridor windows. The deputy from his post of observation, had only a narrow crevice in the wall to peep through and could not make out distinctly the party using the saw, and in anticipation of further work on the bars being attempted, nothing has been intimated to the prisoners that their little plan had been discovered. However, since the attempt was brought to light, the inmates have all been kept in their cells, excepting during meal time, at which time a strict watch is kept on them. Singularly enough, immediately upon the discovery by the deputy of the attempt at delivery, the sawing ceased. One of the bars had been sawed half in twain, and the crevice filled with beeswax. It is thought that the fact of their being kept in the cells has aroused their suspicions, as heretofore they have been granted much freedom. There are six prisoners confined in the county jail.—Baker Democrat.

#### Public Notice.

All parties holding claims against the Sumpter Water company, proper, are requested to present them to the company's office for examination and audit.
