

Grizzly Gold Mining Co.

CAPITAL \$500,000

in 1,000,000 shares of the par value of Fifty Cents Each. Treasury Stock 400,000 shares.

FULL PAID AND NON-ASSESSABLE.

OFFICERS:

President, JNO. J. PENHALE,
(Gen. Mgr. Bunker Hill Gold Mining Co., Sumpter, Oregon.)

Vice-Pres., ALBERT GEISER,
(President Citizens Bank, Baker City.)

Treasurer, EUGENE SPERRY
Secretary, R. C. PENTLAND

PROPERTY

The Grizzly group consists of the "Colorado" and the "Colorado Extension" quartz mineral claims, situated in the Sumpter District of Baker county, Oregon, six miles northwest of the town of Sumpter, forming part of the rich mineral zone wherein are located producing mines of fabulous wealth, such as the "North Pole," "Columbia," "Golconda," "Bonanza" etc., etc. Development work on the Grizzly group has disclosed a gold bearing ledge of remarkably high value, development work has progressed and there is every reason to expect the property will become one of the greatest mines in Oregon.

Read Our Proposition Carefully

A limited amount of Treasury Stock is offered for sale at **SIX CENTS** per share, payable cash down or in twelve monthly payments, the funds realized being used for opening up the property and making a producing mine of it. The purpose of the company is to have a steady inflow of cash to meet monthly pay roll and expenses incidental to active development work. This can be realized by selling stock on monthly installments just as well as if selling for all cash.

Remarkable Opportunity

The following offer is made investors for the purchase of Treasury Stock: **2,000 SHARES AT 6c PER SHARE, \$120.00; TERMS, \$10 PER MONTH UNTIL PAID. LARGER BLOCKS OF STOCK ON PRO RATA SCALE.** This plan enables many investors to secure control of a larger block of stock than if paying all cash, thereby affording the opportunity of gaining enormous profits on actual cash outlay, it being considered a certainty that long before the last monthly payment shall be made, active development will make the stock worth, on the open market, several times the value at which it is now being purchased, with a strong probability that par value will be attained. Subscriptions for stock may be sent to the FIRST BANK OF SUMPTER, Sumpter, Oregon, or to the Secretary of the Company. For prospectus and further information, address

YAMHILL COMPANY.

Representative Here Preparing to Develop a Mine

Richard Baird, secretary and treasurer of the West side Gold and Silver Mining company, has been in Sumpter for several days past. This is the company organized by North Yamhill people, about twenty in number, mention of which was made in THE MINER last week. The property was purchased in April. It consists of three claims, the Greenhorn, Virgin, and Myrthful, adjoining the great Diadem. There is a shaft on the first named, down fifty feet and in ore that yields forty dollars in gold on a mill test. There are considerable improvements on the property, including a hoist.

Mr. Baird is now at the mine for the first time. On his return here he will decide when work will be commenced. It is the intention of his company to do some extensive development this season.

In company with W. C. Calder, he will visit all the principal mines in Granite, Lawton, Susanville, Robinsonville and Bonanza districts before returning to Sumpter.

With Sumpter Mr. Baird is most favorably impressed. He was surprised to find here such a large, prosperous camp; with electric lights, water works and other necessities of civilized life. But the great volume of business transacted here is what pleases him most, for from this he can judge with assurance that the camp is backed by a mineral district of unusual merit. He will remain here during the season.

Concord Still in Improving Ore

J. H. Robbins returned a few days

since from the Concord mine, near Lawton, in which he is largely interested. He is much encouraged over the outlook. The tunnel is now in over 400 feet, a depth of about 250 feet having been attained in that distance. One ledge has been cut and they are driving for another one, further in. On the ledge already cut they have drifted 225 feet and are still in improving ore. The Concord bids fair to be one of the great mines of the district.

DIADEM BECOMING FAMOUS.

Strike on the Brindle Horse Assures Permanence of the Mine.

Manager J. K. Pardee, of the Diadem Gold Mining company, returned this week from a visit to the company's properties in the Greenhorn, and brings news of an important discovery, and one which assures the future of the Diadem beyond any manner of doubt. The main Diadem ledge, one of the richest, as shown by the repeated assays, in that section of the country, has been uncovered in the Brindle Horse claim of the group, 350 feet from the line between the two claims, and at a vertical depth of 400 feet below the ore body in the Diadem. The exposed vein at this point is three feet wide, and by its character and trend evidences permanence of the rich vein which has been so successfully exploited in the Diadem claim.

Heretofore development work has been confined to this main claim of the group, where a shaft has been sunk 80 feet, and drifts run east and west at the 80-foot level 50 and 23 feet respectively, and an east drift at the 50-foot level has exploited the vein to a distance of 25 feet. The pay shoot at the 80-foot level assays \$619.00; the face of the drift at the 50-foot level, seven feet wide; assays \$301.64; dump samples average \$60.35. No assays have been made of the ledge encountered

in the Brindle Horse claim, but Superintendent F. F. Grimes is authority for the statement that the rock pans freely, showing as high as 20 colors to each pan.

This new development has changed all plans previously decided upon for future work. A 500-foot tunnel will be driven on the Brindle Horse vein, which will give a depth below the old shaft of approximately 300 feet. General Charles S. Warren, president of the Sumpter Townsite company, who is also president of the Diadem company, has often stated that "if the ore in the Diadem shafts holds out for another 100 feet the mine will be worth a million dollars."

This encountering of the Diadem vein in the Brindle Horse claim, 400 feet deeper, establishes an even greater value for the mine.—Sumpter correspondence in Seattle Times.

More About the White Swan Swindle

THE MINER in receipt of another letter from Letson Balliet dated at San Francisco, May 30, about that notorious White Swan fraud. He also sends a lot of advertising literature, signed by W. W. Woodard, who is working the Des Monies end of the swindle. This stuff is all so coarse and rank that it was evidently intended to deceive only the farmer jays of Iowa. Balliet makes some very serious charges against Woodard in this letter to THE MINER, closing with this sentence. "If he keeps this up much longer, I will endeavor to land him in the penitentiary."

Mineral Production of Utah

During the calendar year of 1899 the output of the precious metals by Utah's mines was as follows: Gold, \$3,506,581.66; silver, \$0,287,240.72; copper, \$1,552,034.34; lead, \$3,020,518.23; making a grand total of \$18,266,383.95, being an increase over the previous year of \$3,612,148.—Mining Review
