CAPITAL
STOCK
\$150,000

1,000,000 Shares of
Par Value of 15 Cts.
Each.

Fully Paid and Non-
Assessable

PROPERTY:

THE COMPANY owns four claims, all adjoining, and a mill site, being 6000 feet in length by 600 feet wide, and the mill site covers five acres. The claims are known as Chance, American, Gold Hill and Grand Prize, and the American mill site. These claims are located about five miles west from Sumpter, Baker County, Oregon, and are reached by a good wagon road and are surrounded by developed properties, such as the famous IbeX, Maiden's Dream, Evening Star, and several other promising mines. There is ample timber and water on the ground for all mining purposes.

DEVELOPMENT.—Since March, 1900, the company has done over 500 feet of miscellaneous work, to determine the best method of permanent mining and have reached a depth of over 160 feet, where values have varied from ten to several hundred dollars per ton, with better than \$15 AVERAGE VALUES.

PLANS FOR THE FUTURE

IT BEING a foregone conclusion from the development already made that the Umpqua group of mines, with proper opening, can be made one of the dividend payers of Oregon, and that rich ore bodies can be opened up with a reasonable expenditure of money in a short space of time, and the management being exceedingly anxious to push the development work, by either drifting or sinking from the end of cross-cut tunnel or by running a cross cut lower down on the creek, (which will be short) then drift on vein and depth will be gained as work proceeds, and ore will be taken out at all times. In order to raise the money required for immediate use, the company has decided to place for sale

50,000 SHARES OF THE STOCK AT 3 CENTS PER SHARE

to such persons as may be offered an opportunity to purchase. The right to withdraw the stock from sale without notice is however reserved by the company.

HOW TO OBTAIN THE STOCK.—Applications for stock of the UMPQUA MINING & MILLING COMPANY should be addressed to Secretary W. F. BURLISON, or Treasurer A. P. GOSS, Bank of Sumpter, Sumpter, Ore. Any person purchasing stock will at all times have access to the mines by making application to the general manager, and all books and reports of the company will at all times be subject to examination.

PROMISING NEW DISTRICT.

Situated at the Head of Salmon, Marble and Mill Creeks.

A comparatively new mining district is being opened up on that spur of the Elkhorn mountain in which head Salmon, Marble and Mill creeks on the Baker slope, and Elk, Alder, Miner and Deer creeks on the Sumpter slope. There is no occasion for excitement but there is every promise and indication that several paying mines will be opened up in that section in the near future. As in most other localities all the ground near the most promising claims is staked off, so that a rush of prospectors to that section would only end in disappointment.

John Howard, one of the most successful prospectors in eastern Oregon, is interested in several locations in that district, some of which promise to become paying mines from the grass roots. The largest and best surface showing in the district was discovered by him about two weeks ago. He has two locations on the veins known as the Whale and the Shark. Very little has been done on this ledge so far, so that its width cannot be accurately determined. It has the appearance from the outcroppings of being from 10 to 30 feet wide. It has been opened in several places and prospects well in the pan wherever it has been tapped. No assays have yet been made on the ore, but the pan test shows that the pay shoot is of good length and value. The Whale and Shark are located on the Sumpter slope of the mountain, near the head of one prong of Alder creek.

The Snow Drift is also a very promising prospect. It is located on the divide and extends down the Baker slope of the mountain, at the head of Marble creek. There are two claims on this vein, Snow Drift No. 1, and Snow Drift No. 2. They are owned by Howard, Boyle and Adams. These claims were located on the

16th of July, since which time considerable development work has been done, showing the vein to be from three to six feet wide. It prospects well in free gold, assays showing that the ore will average \$8 per ton. There are streaks, of course, that will run away above that figure.

There are also several locations at the head of Mill creek, which carry values ranging from \$10 to \$40 per ton in sulphide ore. Very little depth has been attained on any of these claims.

Walter Mead has spent a week or so in that district and has one or two locations. Among others who have locations in the locality may be mentioned Jas. Gavin, A. G. Hemple, Frank Alfred, N. E. Darling and John Roth.—Emmett.

New Manager for the Badger.

The affairs of the Badger Mining company at Susanville, Grant county, are now in a way to be adjusted in a practical way and there is a very bright prospect of the two mines of the company, equipped with an 8-stamp and a 10-stamp mill respectively, to resume operations on an extensive scale and return handsome profits to the shareholders. D. Ross, one of the three brothers who have been prominent in mining circles in Nevada and California for many years, where they have managed mining properties with remarkable success, has arrived in Baker City from San Francisco. Mr. Ross has been selected by the directors of the Badger Mining company to manage its affairs and direct the operation of its mining properties in Susanville district. Mr. Ross is accompanied by Mr. Jack Sadler, a machinist of considerable note in Nevada, who will direct a re-arrangement of the mill plants at the mines. Mr. Ross leaves for Susanville this morning.—Baker City Democrat.

Only the best of Wines, Liquors, Ice Cold Beer and temperance drinks at Barnard's Halfway House.

DISCOVERED JOHN DAY PLACERS.

Judge Morrow Came up from California in 1862 as a Miner.

United States Circuit Judge Morrow who came here from Seattle with United States Circuit Judge Gilbert to hold a term of United States Circuit Court of Appeals, will remain until Thursday, when he and Judge Gilbert will leave for San Francisco. Judge Morrow is no stranger to Portland, having seen it first in 1862, and having passed through here a number of times since. He has also mined for gold in Oregon, and once owned and conducted a pack train in this state. He came to California in 1859, when he was 16 years old. During the excitement in 1861-2 on account of the rich diggings discovered at Florence, Idaho, he was one of a party of about 50 who started with a complete outfit—horses, pack animals, etc.—for the Florence mines.

They come through from California into southeastern Oregon, and were the discoverers of the Canyon City mining district, on John Day river, but at that time they did not know what district they were in. Judge Morrow saw the first pan of dirt washed out in that section and after the party had prospected a while there they moved on over into the Powder river country, where there were a number of mining camps. After a while the greater number of the party proceeded to the Florence diggings, as at first intended. But Judge Morrow and some others decided to go back to the diggings they had discovered on the John Day, and they mined there all summer with good success.

When winter was coming on they began to think of getting away, as the Indians told them that the winters were hard there. The Indians were not very friendly and desired to get them away. At this time Judge Morrow embraced an opportunity to trade two claims he owned for a pack train, and at the age of 19 he

navigated this train through a region of unsympathetic, if not absolutely unfriendly, Indians to The Dalles, where he sold the whole outfit and came to Portland, then a small place, but a thriving business center. Judge Morrow will during his stay here take a run up to The Dalles, which town he has not visited since he sold his pack train there in December, 1862.—Oregonian.

Governor McIntosh "Out of Politics."

Hon. C. H. Mackintosh, formerly resident manager for the British America corporation at Rossland, left yesterday afternoon over the O. R. & N. Co.'s line for the coast. In Canada, as well as in the United States, a general election is on the tapis, but the ex-lieutenant-governor of the Northwest Territories seems to have dropped out of Canadian politics. His defeat by Smith Curtis at the last provincial election was severely felt by Mr. Mackintosh. Up to that time it had been fully intended by Sir Charles Fupper and other conservative leaders that Mackintosh should be their candidate in the high constituency of Yale-Kootenay-Cariboo. But when Smith Curtis beat him provincially a few weeks back the governor practically gave up politics, and his name did not come before the conservative convention held at Revelstoke Saturday. A. H. McNeil, a Rossland lawyer, was chosen as the conservative candidate. It is perhaps just as lucky for Mr. Mackintosh that he is not a candidate, for it is said that \$40,000 is an under-estimate of what the campaign in Yale-Kootenay-Cariboo will cost. There is no doubt but what his experience as a member for that riding helped toward the recent assignment of Hewitt Bostock, who a few years ago came out from England with several hundred thousand dollars.—Spokesman-Review.
