

# MEN MADE STRONG!

## NO DRUGS

**T**HE Dr. Sanden 1900 model cell Electric Belt pours the life-giving current into the system all night while you sleep. The attachment for men acts directly upon the prostate gland, bladder and all surrounding parts, giving nerve strength. It overcomes those private disorders which result from indiscretions or excesses. No drugs to wreck the stomach. Worn by women as well for Rheumatism, Lamé Back, Kidney, Bladder troubles and all nervous disorders.

Dept. 19, Russell Building

### NO BURNING

**A**LL applying parts of the new Dr. Sanden Electric Belt which touch the skin are covered with a soft, antiseptic material of my own invention, which absolutely prevents the burning or blistering known to old style belts. These can be used on my appliances only. The name "Sanden" on an Electric Belt means standard. Write for my little descriptive pamphlet sent sealed free, or drop in at my office for free consultation, where the belt can be examined and current tested.

### BLUE JACKET MINE FLOODED.

Work Suspended Until More Pumping Power is Installed.

The Blue Jacket mine has suspended operations. The miners were told of the intended move but a few hours previous to the actual closing of the mine, though they were prepared for the move owing to the fact that it was planned to all that the present machinery was unable to cope with the gradually increasing flow of water in the Blue Jacket workings. Nevertheless the announcement came as a surprise and a shock to the camp generally and no small amount of downheartedness is the result of the move.

It was announced to the miners and to the camp in general on Monday that the suspension would be only temporary and that work would be resumed on a much larger scale as soon as the new pumping plant and boiler could be put in position, and the timber cutters were notified to report for work next week. This, in itself, would indicate that the intentions of the company were good and that the work of taking out ore will be resumed in earnest in the near future.

The greater number of the men employed in the mine came down to Cuprum Monday, and while some will remain here the majority will spend the enforced vacation in the valley towns. Nearly 30 men were laid off on Monday and the remainder will follow when necessary repairs at the mine are completed. The general feeling is that work will be resumed about the first of the month.

Stuart French, superintendent of the Blue Jacket, passed through here Tuesday on his way to Salt Lake to attend to the immediate shipment of the new machinery.—Cuprum Standard.

### Modern Mining Machinery.

The Merrill's Mill company, of San Francisco, is exceedingly busy getting out its improved machinery. It has lately

shipped to the Red Chief Mining company, of Red Bluff, Montana, one of its No. 2 roller mills, concentrators, improved "roll" rock breaker for fine crushing and other appurtenances. Also to the Jersey Blue Milling and Gold Mining company, Ohio City, Gunnison county, Colorado, one No. 2 roller mills and improved roll rock breaker; also to the O Be Joyful mine, Ballarat, Inyo county, California, one No. 3 roller mills. This mill displaces another roller mill that has been working on the mine. The company has also lately shipped to the Century Mining company, Terrace, Utah, one improved rapid crushing three-stamp mill; also to the Alamance Mining company, Elk City, Idaho, S. K. Bradford, superintendent, one rapid crushing three-stamp mill; also two rapid crushing three-stamp mills, 1200 pound stamps and outfit to the Tuba mine, in Inyo county, California. These mills will have a crushing capacity of about ten tons to the stamp, or a combined crushing capacity of about sixty tons. The Merrill people will also install the cyanide plant for them. These mills are rapidly coming to the front, keeping the above named company exceedingly busy. The value of these mills as crushers has been demonstrated, and their work is recognized by mining men everywhere, and they are rapidly displacing all kinds of mills, and old stamp mills are being remodelled with their late improved mortars.

### Bought a "Gold Brick" Instead of a Horse.

It is now stated that the Baker City man who bought Miss Remsen during the fair here simply invested in a gold brick. At Lewiston she did not win either first, second or third money in any event in which she started, and a well known horseman said last night that her running days were over. He also said she was brought to Boise and doctored up for a long race early in the meeting for the purpose of making a sale.—Boise Statesman.
