R. C. PENTLAND, - Secretary

Grizzly Gold

Mining Company

Capital \$500,000

In 1,000,000 shares of the
par value of Fifty Cents
Each. Treasury Stock
400,000 shares.

FULL PAID AND NON-ASSESSABLE

OPPORTUNITY

Treasury Stock at TEN CENTS Per Share

CASH BASIS—All Cash Purchasers Receive a Discount of Five Per Cent on the Investment.

INSTALLMENT BASIS—Purchasers May Secure Stock in Blocks of 1000 Shares and Upwards, Payable 10 Per Cent Down and 10 Per Cent Each Month Until Paid.

GRIZZLY STOCK

Affords an opportunity for profitable investment that cannot be equaled in the Sumpter District. The mine is now being actively operated and has reached a degree of development practically assuring the stability of the mine. The ledge, carrying high values in gold, copper and silver, is over 40 feet in width. Work is being rapidly pushed, tunnelling and sinking on the ledge, blocking out ore and adding to the pay dumps, and it may be expected that the mine will be a producer and the company a dividend payer at an early date. Every dollar realized by the company from the sale of treasury stock is being used for improving the property. The sale of stock will be continued until the mine is a producer. As development progresses the price of stock will be advanced.

Secure this stock now at 10 cents. That it will be worth its par value within 12 months is a conservative estimate. Subscriptions for stock may be sent to the company direct, or to the First Bank of Sumpter, Sumpter, Ore.

RICH INTER-MOUNTAIN

Samples Received From Recent Strike in the Cayuse

Samples have been brought in from the Inter Mountain taken from the rich strike on that property, reported in these columns last week. This new body of rich ore was found while drifting on the Cayuse ledge, 100 feet below the upper workings.

The ledge is three feet thick and has been uncovered for a distance of 57 feet. A number of assays have been made and the lowest gave \$13.61 in gold, besides the silver, which predominates. It is the opinion of those competent to judge, who have examined the vein, that it will average better than \$10 in gold throughout its entire thickness and length so far as shown.

The Inter-Mountain is fast proving to be one of the best in the district and will no doubt be worked with heavy machinery next season. The owners make the undisputed claim for it that, with the one exception of the Ibez, it is the most extensively developed mine in eastern Oregon on which a mill has not been erected.

W. C. Calder, who owns a controlling interest, has persistently pursued what some people think to be the too conservative policy of continuing to block out large bodies of ore; not even shipping any of the high grade \$100 rock now on the dump. His idea is that transportation and reduction charges would eat up much of the profit that the company can save by treating its own ores. And it must be granted that this policy, though it does postpone the dividend date, renders that time a practical certainty, as well as increasing the size of the dividends.

Appropriations for Pacific Coast Waterways

A Washington City press dispatch dated the twenty-first instant, says: The

river and harbor bill was completed tonight and Chairman Burton gave out a statement showing the amounts to be appropriated. The total is approximately \$60,000,000, of which about \$23,000,000 is on direct appropriations and about \$37,000,000 is authorization of contracts for continuous work. Compared with former river and harbor bills the present one is the largest on record, and after the senate has added amendments it is expected to be well up to if not ahead of all previous records. Some of the items are: Oregon—Tillamook bay and bar, cash, \$27,000; Washington—Olympia harbor, cash, \$25,000; Tacoma, cash, \$30,000; Columbia river at Cascades, cash, \$30,000; mouth of Columbia river, cash, \$400,000; contracts, \$1,500,000; lower Willamette and Columbia rivers below Portland, cash, \$225,000; Willamette river above Portland and Yamhill river, cash, \$70,000; Coquille river, general improvements, \$40,000; Siuslaw river, mouth of, cash, \$20,000; examinations, surveys and contingencies of rivers and harbors, inspection of bridges, etc., cash, \$200,000.

Indian Allotments Held Up.

The local land office is in receipt of instructions from the general land office to postpone all the cases against the Indian allotments until further instructions. This step is not understood here, but it is hoped that it is a step by the land officers in Washington to investigate this wholesale giving away of the best land of the county to a renegade and worthless band of Indians, who know nothing about the land allotted them, and care less, and over one half of whom never saw the land and never intend to do anything with it. Besides this, nearly one-third of those allotted have passed to the "happy hunting grounds." The cancellation of these allotments will make homes for many desirable citizens and become a great wealth producing part of the county.—Harney County Items.

ELECTRIC POWER PLANT.

Big Proposition Being Discussed Over in Union County.

A big electric power plant for east Union county is again talked of and may become a reality during the coming year. About a year ago the scheme was considered by parties representing capitalists and various locations examined on the several streams of this section of the county, and it seems that when all things are considered that Eagle creek is especially adapted to such a plant.

The scheme is to build a ditch from Eagle creek, near Sanger, about thirty miles east of Union, for the purpose of furnishing power for operating dynamos and generating electricity for distribution to the adjacent mining camps and towns of Union county for electric lighting and power purposes. It is believed that there is already sufficient business in sight to justify the building of the plant and the rapid increase of business is hardly problematical.

Power could be transmitted to Cornucopia, Sparta, Sanger, the Pine and Eagle valley towns and the mines of east Union county and even Union, and other not too distant places.

The undeveloped power of Eagle creek, which is estimated to have over 2000 inches of water at the lowest stage, is very great and if it is harnessed as is proposed, it will materially assist in the development of Union county and her mines.—Union Republican.

A fine selection of goods suitable as Christmas present will be here in a few days, including the following: Fine French china ornaments and useful articles, solid sterling silver table ware, novelties, Rogers Brothers knife, forks, spoons, etc; also a full line of watches and jewelry. F. C. Brodie, Opera House building.
