The Demand For Sumpter Gold Properties

IS GREATER AT THIS PERIOD THAN
IN ALL THE HISTORY OF EASTERN
OREGON MINING EXPERIENCE.

We want any number of legitimate mining propositions that will bear the very strictest examination. Dividend paying mines, partially developed mines with ore reserves, prospects with merit are asked for. In listing properties with us, state specifically cash and bond price. ❖ ❖ ❖ ❖

SOMETHING ABOUT PROMOTING.

Pointers on How to Put Salt on the Tail of Coy Capital.

Capital will not take the initiative in seeking investment of any kind—it must be persuaded of the possibility of returns. The promoter of whatsoever enterprise will make a great mistake if he plans on money coming to him upon the announcement of his undertaking. It means hard work and it means intelligent work to secure capital. The men who possess money are not fools, nor are they willing to hand over their funds for investment without some idea of getting good interest. Further than this, capital is timid until assured of the safety of an investment, but once interested and convinced of the prospects of good returns it will go to the end.

A great many promoters, and especially of mining enterprises, make mistakes by trying to get money before convincing the possessors of capital of the possibility of the project. If you can convince men of money by taking hold of your scheme, you may rest assured they will be willing to do it—for there is no man who likes to make money more than the one who has made it.

Nor is it necessary that the promoter have capital himself. If he has an intelligent idea of how money can make money, he can find some one who will listen to him. And there are two ways of promoting—one to interest capital for a reasonable consideration expected from the capitalistic side and the other to expect consideration from manipulation of the property in turning it over. The latter method is dangerous to a man who wishes to continue in the business. The other method conscientiously followed will bring him success if he promotes substantial enterprises.—Northwest Mining News.

Another Ore Shoot in the Quebec.

On Monday the workmen in the lower

adit of the Quebec mine, owned by the Oregon Colorado Gold Mining company, and located near the Alamo, broke into a big body of high grade free milling ore. This ore shoot is entirely distinct from the one upon which work was prosecuted all winter, and adds new evidence to the undoubted richness of the Quebec. Work on the building for the Quebec 10 stamp mill is being pushed with all possible vigor, and it is likely that stamps will begin dropping by July 1. The Quebec group, which consists of the Quebec and High Ore claims and millsites, was purchased from the Grant Gold Mining company last January by the Oregon-Colorado Gold Mining company, a strong corporation of Colorado capitalists, headed by J. W. Carr, S. N. Farris (now deceased) and S. N. Farris, Jr., for \$40,000. The group is developed by three tunnels, two of which are 400 feet, driven on the ledge. A 120-foot winze between the tunnels is all in ore averaging \$14. From 10 to 12 feet of the ledge, which has been crosscut for 30 feet, carries values better than \$8, while streaks of from 6 to 18 inches assay from \$40 to \$60. Manager Farris is working two shifts in each adit and intends to drive 2600 feet in both workings. This will give backs of 700 feet. It was in the lower tunnel that the rich shoot was encountered this week.—Baker City Herald.

Stampede to Pleasant Valley.

In another column of THE MINER today is an item, taken from the Baker City Democrat, about a rich strike of chrome iron in Pleasant Valley. That paper yesterday, in reference to the same says: Early Saturday morning the locators of the new find left this city and arrived at their claim, set about its proper location. While they were there they counted over thirty prospects in various directions from their camp and they were advised that they had better lose no time in setting their stakes. Yesterday morning W.

L. Vinson, who is a part owner in the Baisley discovery, outfitted his partners with tents, grub and everything else necessary to do development and the outfit went out to the location to commence active work. Mr. Vinson is not the man to let a claim lie idle. Whether good or bad he wants to know at the earliest possible moment. His partners are practical miners, so they will lose no time getting at the milk in the coconut. All over the district prospecting work is being energetically applied and from all reports many good finds are being made. The district is free from snow and affords every advantage for prospecting work.

Gracious Act of R. E. Strahorn.

The Sumpter Brass band boys are receiving the encouragement they deserve from the local public for their earnest effort to become efficient. In addition to the liberal subscription list here, the following communication was received from Mr. Strahorn, owner of the Sumpter water plant, by E. W. McCammon, his secretary and accountant, dated at Philadelphia, March 27: As to the band, I think it a very deserving institution and does much to cheer up any town, besides cultivating a love for music, which is always elevating in its tendency. You may tell them for me that they can order such music as they require from time to time until further notice and send the bills to me for payment.
