CONCORD A BONANZA.

Ore Already Blocked Out That is Worth Millions.

The future of the Concord mine has been conclusively settled within the past few weeks, and that it is destined to become one of the great big mines of the world has been demonstrated beyond an opportunity for a quibble. The above facts set forth are apparent to anyone who will visit the property and place himself for a brief hour in the hands of W. W. Robbins, manager of the mine, or Foreman C. J. Carlson, either of whom will take pleasure in demonstrating that we speak nothing but the truth and yet we have not told half of it.

As stated in these columns a few weeks since, the big Blaine ledge has been encountered in the east crosscut and for ten days or more work has progressed steadily on the drift. The average assays of the pay shoot, which is more than three feet in width, will run above \$30 per ton. The ledge is unbroken and is the most clearly defined and handsome proposition in these mountains.

In the west crosscut recently a magnificent lode, measuring nearly 10 feet from wall to wall, has been opened and work of drifting on this is now in progress. This is supposed to be the Concord vein proper, and is expected to show wonderful values when properly exploited. The Concord mine can now measure up a million dollars worth of high grade ore. There is little doubt but a big mill will be erected on this property during the summer.—Lawton Standard.

Value of Chromic Iron.

Since a great amount of chromic iron is found in parts of Grant county, information on the subject will be of value to all parties who are developing this class of properties. This information can be relied upon, since it has just been re-

ceived at this office from the International Correspondence school of Scranton, Pennsylvania: "To be of value chromite must contain above 50 per cent chromic oxide. Pure ore contains 68 per cent of the oxide. Ores which are of the greatest value average about 55 per cent. Those below 50 per cent are practically worthless. California ores, delivered on the Atlantic coast, bring about \$23 per ton for ore containing 50 per cent of the oxide, and bring about \$1 extra for each unit above 50 per cent."—Canyon City Eagle.

Organized Band of Cattle Rustlers.

The statement is made to a Boise newspaper that the country between Winnemucca, Nevada, and Ontario, Oregon, is infested with an organized gang of cattle rustlers. We have heard no complaint on this subject from local stockmen, and are loth to think that the industry in this section is subject to more than the usual amount of speculation, which honest endeavor meets always and everywhere. Our cattle men are active and alert, and we fancy their interests are quite well safeguarded.—Harney County News.

MAP GIVEN AWAY.

How to Get a Large One of the United States, for the Wall.

If you are going east, or thinking of sending for your family, do not buy your tickets until you have secured rates from the Illinois Central Railroad company. Their service is excelled by none, and they can reach all points in the east, south and southeast from any point in Oregon, Washington or Idaho. Through tourist car from Pacific Coast to New York.

If you will send fifteen cents in stamps to the address given below, we will forward you by return mail a large wall map of the United States, Cuba and Porto Rico, 34x40 inches.

For particulars regarding passenger or freight rates, call on or address,
B. H. TRUMBULL,
Commercial Agent, 142 Third street, Portland Oregon.
