 PAR VALUE \$1 00 EACH

Home Office

Sumpter, Oregon

This Mine is Working Every Day

This Mine is a Shipping Mine

The Baker City Sampling Works gives the following returns for two small shipments: Lot 68-1, 253 sacks of ore, dry weight, 13,063 pounds. Gold, 7 ounces; silver, 9.40 ounces. Gold per oz, \$20; treatment cost \$8. Net price per ton, \$130.50. Freight, \$7 per ton. Net value of lot, \$890.24. Lot No. 102, 378 sack ore; dry weight, 18,810. Gold, 6.20 ounces; silver, 9 ounces; gold \$20 per ounce. Cost of treatment, \$8; net price per ton \$115.80; freight at \$7 per ton; net value of lot, \$1019.94.

THE SHAFT is now down 70 feet. Tunnel now in over 700 feet. Rich body of ore in shaft (sinking stopped on account of water) should be reached in the tunnel in 300 feet, or by July 15. The directory is a guarantee of good faith. It is true that all prospects do not make mines, but it is also true that all mines were once prospects. Here is what the experts say of the Diadem: F. F. Grimes, a prominent mining man of Republic, Wash., says: "I consider the Diadem the best property I have ever examined. It is surely a remarkable showing and, in my judgement, the making of a great mine." Hon. Chas. Bonner, connected with Granite Mountain mine, in Montana, says: "In all my experience as a mining superintendent, extending over a period of 20 years, I consider the Diadem is by odds the best mine I have ever been connected with." Hon. J. K. Pardee, a mining expert well known all over Utah, Idaho and Montana, says: "In all the years I have mined I never saw a prospect that made the showing of the Diadem mine." A. L. McEwen, M. E., one of the best known English experts throughout the entire northwest, says: "For an undeveloped prospect, I consider it among the very best I have ever examined. I believe it will prove to be a great dividend payer when developed." Mr. James O. Loundigan, M. E., of Republic camp, Wash., and Boundary district British Columbia, says: "After making a large number of assays from this property, I am convinced that it is the best thing in Eastern Oregon for the amount of development work done."

The above is a plain business statement of this property. The management now offer for sale 50,000 shares of the treasury stock at 15 cents per share. Applications for stock must be accompanied by the money and should be addressed to Otto Herlocker, treasurer of the company, Sumpter, Oregon. For information address,

GOING BELOW WEBFOOT BEDROCK

Humbolt Company Sinking 75 Feet in the Bed of Canyon Creek.

A News representative visited the scene of operations of the Humbolt Mining company this week and saw considerable activity.

The company has a crew of men at work sinking a 75-foot shaft in the bed of Canyon creek, about a half a mile below town, in order to get below the strata of hardpan and determine whether a rich strata of gravel exists beneath. The shaft has already been sunk to a depth of nearly 40 feet.

If the expert's results are obtained, it is the intention of the company to install a big dredger of sufficient capacity to remove the hardpan strata and work the underlying gravels.

The Humbolt placers have been worked by the drifting process since 1862, with big annual cleanups. The nature of the property is that of an old river channel running with gold.

A ditch has been built on it eight and a half miles long, with a capacity of 1000 inches of water. The present owners, who are all men of long experience, have put in two giants and 2600 feet of hydraulic pipe, also self-opening reservoirs. Adjacent to this property there lies over two miles of rich creek bottom, the larger portion of which belongs to this company.—Canyon City News.

Another Suit Against the Smelter Trust.

An Associated press dispatch from Wilmington, Delaware, dated April 25, says: Judge Gray, of the United States Circuit court, in this city, filed an order in Trenton today for the American Smelting and Refining company and M. Guggenheim's Sons to show cause May 13, at Trenton, why they should not be permanently enjoined from making use of the recently issued \$45,200,000 increase in the capital stock of the Smelting and Refining

company. A temporary order has been granted restraining the sale or use of this stock pending a final hearing. The suit was instituted by Irving E. Lingle, of Reading, Pa., an owner of \$50,000 worth of the stock of the company. The suit is a repetition of the one instituted in the New Jersey state courts by W. M. Donald and others, which resulted in a decision prohibiting the issuing of the stock and carrying out of a deal for the absorption of the Guggenheim plant by the Smelting company. The effect of this decision was afterwards nullified by the effecting of a settlement with Donald. Lingle, in his bill of complaint, goes over the same ground covered by the bill filed by Donald in the New Jersey courts, and charges that the deal involved the issuing of \$45,200,000 worth of stock of the American Smelting & Refining company to the Guggenheims, and this was \$23,000,000 in excess of the value of their plant and the money they were to receive in payment.

Good Ore found in the Strock Group.

Mr. F. M. Stanley, of La Grande, one of the owners of the P. G. Strock group of mining claims, on Salmon creek, eight miles west of this city, came in from the mine yesterday and reported that they had struck what is undoubtedly a rich ore body. Describing the find, Mr. Stanley said: "We have been prospecting our bunch of claims for some time, and the other day opened ten feet down from the surface what appears to be a well defined ledge of ore from 20 to 30 feet wide. From assays made the rock runs high in copper and carries gold and silver. Assays went from \$20 to \$400 per ton and Mr. Strock says he believes it will develop into a great mine." I think so much of it that today I traded 62 lots and a house in La Grande for another claim and a half in the group. We intend to develop the property sufficiently to bond it at a good price.—Democrat.
