 Supt. of Mines..... DAVID O'NEIL  
 Gelsner P. O., Baker County, Oregon

In addition to the officers of the company among the stockholders are: Hon. Lee Mantle, late U. S. Senator, Butte, Montana; Thos. R. Hinds, late County Treasurer, Butte, Montana; Hon. John F. Forbes, Attorney-at-Law, Butte; Chas. S. Warren, Speculator, Butte; Jos. F. Pardee, Miner, Phillipsburg, Montana; H. M. Grant, Insurance Adjuster, Portland; Geo. W. McDowell, Broker, Portland; C. B. Richardson, Contractor, Walla, Walla, Wash.; Hector McRea, Miner, Rossland, B. C.; Dr. H. C. Sills, Fort Wayne, Ind., and many others who have investigated this promising property.

## Mines Situated on Greenhorn Mountain

Baker County

1,000,000 SHARES  
 PAR VALUE \$1.00 EACH

Home Office  
 Sumpter, Oregon

This Mine is Working Every Day

This Mine is a Shipping Mine

The Baker City Sampling Works gives the following returns for two small shipments: Lot 68-1. 253 sacks of ore, dry weight, 13,063 pounds. Gold, 7 ounces; silver, 9.40 ounces. Gold per oz, \$20; treatment cost \$8. Net price per ton, \$130.50. Freight, \$7 per ton. Net value of lot, \$890.24. Lot No. 102. 378 sack ore; dry weight, 18,810. Gold, 6.20 ounces; silver, 9 ounces; gold \$20 per ounce. Cost of treatment, \$8; net price per ton \$115.80; freight at \$7 per ton; net value of lot, \$1019.94.

**T**HE SHAFT is now down 70 feet. Tunnel now in over 700 feet. Rich body of ore in shaft (sinking stopped on account of water) should be reached in the tunnel in 300 feet, or by July 15. The directory is a guarantee of good faith. It is true that all prospects do not make mines, but it is also true that all mines were once prospects. Here is what the experts say of the Diadem: F. F. Grimes, a prominent mining man of Republic, Wash., says: "I consider the Diadem the best property I have ever examined. It is surely a remarkable showing and, in my judgement, the making of a great mine." Hon. Chas. Bonner, connected with Granite Mountain mine, in Montana, says: "In all my experience as a mining superintendent, extending over a period of 20 years, I consider the Diadem is by odds the best mine I have ever been connected with." Hon. J. K. Pardee, a mining expert well known all over Utah, Idaho and Montana, says: "In all the years I have mined I never saw a prospect that made the showing of the Diadem mine." A. L. McEwen, M. E., one of the best known English experts throughout the entire northwest, says: "For an undeveloped prospect, I consider it among the very best I have ever examined. I believe it will prove to be a great dividend payer when developed." Mr. James O. Loundigan, M. E., of Republic camp, Wash., and Boundary district British Columbia, says: "After making a large number of assays from this property, I am convinced that it is the best thing in Eastern Oregon for the amount of development work done."

The above is a plain business statement of this property. The management now offer for sale 50,000 shares of the treasury stock at 15 cents per share. Applications for stock must be accompanied by the money and should be addressed to Otto Herlocker, treasurer of the company, Sumpter, Oregon. For information address,

### MELLIS' MINERAL DISPLAY.

Oregon Gold Nuggets Attract Much Attention at Buffalo.

Systematic effort to convey practical information both, to the savant and the average sight seer, is the feature which most impresses in Oregon's splendid exhibit in the mining building.

Commissioner Frederick R. Mellis, of Baker City, who has had charge of the installation of this exhibit, has seen to it that the different specimens are not only properly classified, but that each sample bears in plain legible type a label telling what it is, where it came from and other information concerning it.

Calculated to arouse one's cupidity, is an array of gold nuggets, one of the most interesting features of the exhibit. These range in value from \$1 to \$600 each, and, with the exception of one small gold brick, are virgin gold. For those who desire practical information, large chunks of quartz are displayed on a massive center table, each specimen carrying a label which gives the name and location of the mine from which it came, the width of the ledge, the value of the ore and other information applying to that particular property. The walls are lined with glass cases containing thousands of attractive specimens.

At Saturday night's reception in the mining building, Oregon played a prominent part. Commissioner Mellis presented each guest with a handsome souvenir of the occasion, the memento being a jewelry casket containing rich specimens of ore from Oregon mines.

Oregon has not only completely installed its mineral exhibit, but of all the states it is the first to announce complete installation in every department in which it makes a showing—mines, agriculture, horticulture, forestry and education. H. E. Dosch, superintendent of all the Oregon exhibits, has been the recipient of

many congratulations on account of the celerity with which the installation has been accomplished, but in acknowledging them he simply says:

"Oh, that's the way we do things out in Oregon."—Buffalo Courier.

### Attempt to Form a Copper Trust.

Press dispatches of recent date report that well authenticated advices from New York are to the effect that conferences among the officers of the Amalgamated Copper company have been held in Wall street for the purpose of arranging for the increase of the Amalgamated Copper company's stock from \$75,000,000 to \$155,000,000. It is now proposed to carry out John D. Rockefeller's plan to secure control of all of the important copper mines in the United States. To do this it will require eventually a stock issue of \$500,000,000. As a result of a conference William G. Rockefeller, secretary of the Amalgamated company, sent out a notice to stockholders to attend a special meeting of the company to be held at Jersey City, June 6, to take the necessary action to authorize a stock issue. The new stock will be used to acquire the Boston & Montana Copper and Consolidated Silver Mining company and the Butte & Boston Consolidated Mining company.

### Public Watering Trough.

One of the most commendable acts done by the city recently, is the establishment of a large round drinking tank for horses in the depot square, opposite the Griffin hotel. This is connected with the water main and arranged so as to feed automatically, but cannot overflow, as a drain pipe carries off the water when it reaches a certain height. The next thing to do in connection with this improvement is to prevent the band of Sumpter's meddlesome youngsters from filling up the tank and pipes with stones and mud, as they commenced to do before the same had been in use an hour.
