

AN INVITATION TO PEOPLE AT HOME

YOU HAVE AN OPPORTUNITY TO GET
IN ON A GOOD THING BY BUYING STOCK
IN THE

Gipsy King Gold Mines Company

Shares Non-Assessable

COLORADO is a rich state because stock in its great mines are owned by residents of that state. Some Oregon mines are going to make fortunes for their owners, and the GIPSY KING management hopes that citizens of the Webfoot state will not fail to grasp the opportunity to share in these fortunes.

There is no question but what the GIPSY KING is the most promising prospect in this district. During the past few days a wonderfully rich ore shoot has been discovered. Considering its width, seven feet, it contains sensationally high values. The lowest assay gave returns of \$92.04, and the others ranged upward to \$382 in gold and silver, with plenty of copper and lead besides. People here in Sumpter know the officers of this company are conservative business men and not mining promoters. Talk with them and get their personal opinions. If this doesn't satisfy you, ride out to the mine, inspect the property, select your own samples, have your own assays made, and be convinced that the King is in reality a wonder.

There are still a few thousand shares in the treasury which can be bought for FIVE CENTS a share. No other than treasury stock is for sale. Every dollar received is used for development purposes. You pay your money to J. H. Robbins, president of the First Bank of Sumpter, who is treasurer of the Gipsy King. The company owns the properties it is working, absolutely; the title is perfect, and it doesn't owe one dollar.

OTTO HERLOCKER, Secretary
Sumpter, Oregon
