

**PRODUCING MINES
IN EASTERN OREGON**

**Equipped With Stamp Mills,
Rolls and Cyanide Plants.**

Last March THE MINER published a list of the producing mines of eastern Oregon. The number of stamps, or their equivalent, in use at that time was 703. Since then several producers have been added to the list, and before another six months shall have passed there will undoubtedly be over 200 more stamps added.

It is stated on good authority that the Bonanza will double its capacity. The Red Boy is to add forty stamps to its mill. The Alamo is preparing to build in the spring a forty-five stamp mill. The Belcher will in all probability put in a twenty-stamp mill, and there are others, including the Golden Wizard, Old Abe and North Pacific Mining company.

The following list was prepared by Professor W. S. Eberman, the eminent mining engineer, who is thorough acquainted with the gold fields of eastern Oregon and the reduction plants throughout the district:

North Pole.....	30 stamps and 60 ton cyanide
Columbia.....	20 "
Golconda.....	20 "
Red Boy.....	20 "
Monumental.....	20 "
Bonanza.....	40 "
Connor Creek.....	35 "
E & E.....	20 "
Cracker-Oregon.....	10 "
California, Rolls equal to.....	20 "
Mammoth.....	10 "
Bald Mountain.....	20 "
Bellevue.....	10 "
Hossier Boy.....	25 "
May Queen.....	10 "
Magnolia.....	10 "
Pyx.....	10 "
Tiger.....	10 "
Don Juan.....	10 "
Black Hawk.....	5 "
Richmond.....	10 "
Badger.....	8 "
Great Northern.....	10 "
Golden Eagle.....	8 "
Lawrence.....	5 "
Quebec.....	10 "
Maidnes Dream.....	10 "
Cougar 250ton cyanide equal to	80 "
Baisley-Elkhorn, Rolls equal	20 "
Deer Lodge.....	10 "
Psyche.....	20 "
Maxwell.....	10 "
Blue Bird.....	10 "
Virtue.....	20 "
Flagstaff.....	20 "
and 40 ton cyanide	
Brazos.....	10 "
Uncle Dan, Rolls.....	10 "
Gem.....	10 "
Sanger.....	10 "
Cornucopia.....	10 "
Gold Hill.....	10 "
White Swan.....	10 "
Perry Rachel.....	10 "
and cyanide	
Gold Ridge.....	10 "
Weatherby Bonanza.....	10 "
Golden Eagle, Burnt River..	5 "
Colts.....	5 "
Red, White and Blue.....	5 "
Clarks.....	2 "
Golden Gate.....	5 "
Keaton (Rolls).....	5 "
Present Need (Arrastra).....	5 "
Diadem (Arrastra).....	5 "
South Pole.....	5 "

Five Feet of Cobalt in the Standard.

About ten days ago a five foot ledge, of almost pure cobalt ore was struck in the breast of the lower tunnel in the Standard mine at Quartzburg. The company have tried to keep this secret, but it has at last leaked out. Zoeth Houser came in from Quartzburg Tuesday evening on his way to Echo, where his children are visiting with relatives. Mr. Houser made the statement in regard to the report of the 5-foot ledge, lately struck in the Standard mine, that while some of the ore was pure metal, some of it was not so high grade, thus qualifying the report to a certain extent. He also said that the shipment of one carload of concentrates, about 15 tons, were nearing completion, as only 52 sacks, or about 5800 pounds thereof, still remains at the mine for shipment. These concentrates contain about 10 per cent copper, 8 per cent cobalt and \$100 in gold.—Prairie City Miner.

Dixie Meadows' Ore Goes \$412.

Work is progressing rapidly on the Dixie Meadows Gold Mining company's property. Ten men are at work at present, but two more men will be added to their force, and twelve men will be kept at work all winter. They expect to have everything in readiness for a mill of 75-ton capacity in the early spring. As the work progresses the value of the ore increases. Sixteen assays were taken from 150 feet of the ledge, across the entire width, by an expert, who did not take any of the richest specimens, the average of which brought \$58 per ton. The highest assay went as high as \$412. The width of the ledge will average about 12 feet. These statements are actual facts and fully reliable, given by disinterested men, whose reliability and truthfulness cannot be disputed, no, not even doubted.—Proirie City Miner.

Progress on Cracker-Oregon Mill.

The machinery for the Cracker-Oregon is arriving, but has been somewhat delayed, owing to the heavy snowfall. The mill building is ready for the machinery, which is being placed as rapidly as it arrives. The next ten days or two weeks will probably see the arrival of all or practically all the machinery. The mill building is one of the best ever constructed in eastern Oregon and much credit is due Milwright Laidlaw and Wm. Stedman who had charge of the work of construction. All the heavy timbers were sawed by special order at the McEwen mill, where a band saw is used giving the timbers practically the same finish as dressed lumber. The long timbers are all one piece, no splices being employed, giving much greater strength to the building.—Bourne News.

WANTED

Blue Bird Sampson

We have a prospect with a fine ore showing and several hundred feet of tunnels that can be bought at low price if taken at once.

Wilson & Bucknum

MINING INVESTMENTS

Gleason Bldg SUMPTER, ORE.

**This is
"Worth Your While"**

OUT IN THE Famous Cable Cove district there is a prospect that is the making of a great mine. This we know to be an absolute fact, because on both sides of it the ledges have been proven to be wide and rich, both width and values increasing to a known depth of 1000 feet. On these particular claims sufficient development work has been done to demonstrate that the ore is there.

We need money with which to block out and treat the ore, and you can get in on this good thing at ground floor prices. You can buy an interest, large or small, in a property that is sure to develop into a mine, at a figure usually charged for an unproven prospect.

Write and let us submit to you an exceptionally favorable proposition.
