Can This Statement Be True?

Even Portland, Oregon, is beginning to wake up to the wonderful results and even more wonderful possibilities of the future of mining in eastern Oregon. A Portland newspaper published a special edition last month giving a glowing account of the vast mineral zone of wealth lying in eastern Oregon. In time the business men of the chief city of that State will discover that gold mining is the most important industry of a great part of Oregon, and, in proportion to capital invested, the most productive in the ratio of about 20 to 1.—North American Miner.

REDUCED RATES FROM THE EAST

Commencing February 15 and continuing until April 30, there will be low rates from the east via the Illinois Central railroad to all Washington, Oregon and Idaho points. If any of your friends or relatives in the east are coming west while these rates are in effect, give us their name and address, and we will make it our business to see that they are given the best possible service. We operate through personally conducted excursion cars, and in fact give you the benefit of the latest conveniences known to modern railroading. We have fifteen different routes between the east and the west, and are in position to give you the benefit of the best combinations. Write us and we will give you full particulars.
