THE SUMPTER MINER

If you will give us just a few minutes of your valuable time we will briefly set forth the Merits and Future Possibilities of Our Property. We know we have a splendid Business Proposition, and believe we are rendering good service in spreading the Untinted Facts before you. We wish we had an hour to talk the matter all over with you; better still, we should like to take you to our Property and show you every Foot of Gold Bearing Ground. Since these are impossibilities, for the present at least, we kindly ask you to listen to our story.

We are an Incorporated Body, known as the OLD ARRASTRA GOLD MINING COMPANY. The Capitalization has been fixed at One Million Dollars, Divided into One Million Shares of the Par Value of One Dollar Each. One half of this stock has been Reserved as Treasury Stock, the sale of which will provide ample funds to Further Exploit the Property and Purchase the Necessary Machinery to make it a steady and Profitable Producer. This Stock is Non-Assessable and carries no Personal Liabilities. Since our Incorporation is Under the Laws of Arizona. It is also Fully Paid when the Certificate is Issued to the Purchaser. In view of our very reasonable capitalization, Net Profit of only Ten Thousand Dollars Per Month, would pay Twelve per cent per annum, on the par value of the entire stock, or the Enormous Profit of One Hundred and Twenty per cent per annum on the present price of stock. Our Superintendent and General Manager, a man of large mining and milling experience, very conservatively estimates, that by handling only Twenty Tons per Day from our Richest Ledge we will have a net Profit of almost \$20,000 per month, which would make over 200 per cent Dividend a Year on the Investment at the Present Price. Where can You Hope to Place Your Money that it Will Have Greater Earning Power?

The property which we own, free of all encumbrances, is located in the Granite District of the rich Sumpter Gold Fields. The Cougar, with a cy anide plant of 250 tons daily capacity, and the Monumental, one of the first Producers of the district, are near neighbors. We have four full quartz claims equal to 80 acres, ten distinct ledges varying in width from two to twenty feet across our ground. There have been exposed on the surface by the placer mining of previous days, and by 500 feet of underground development. Three crosscuts have been run tapping these veins at depths of 50 to 100 feet. From two of the tunnels the former owner took ut ore netting him \$75,000. The ore is free milling and concentrating, and carries some silver and gray copper values, gold predominates very largely. Numerous assays made at different times show the ore to be very rich; the average ore is about \$40 per ton, the lowest assay showing \$6 and the highest \$339.78. In addition to large ore-bodies, with splendid values, we have all the accessories necessary to Sumpter mining in the way of timber, water and buildings. All we need is your co-operation. Our stock is placed at a very fair figure considering the development and results achieved. We are anxious to have you make large money out of this enterprise, and therefore offer you stock at **Ten Cents per**

If you are interested in this Proposition, write us and we will be glad to place an interesting booklet in your hand embodying all the details.
