

We Come Before You for the
First Time to Offer Stock in the

Standard Consolidated Mines Company

Before you purchase any of this stock, however, we want you to know something about our property, its Ores, Value, Development and any other data that may help you to an understanding of our proposition. We believe we have a very meritorious investment to offer you, and are confident that after due reflection upon the facts you will coincide with our judgment.

Our property is what is known as a Gold-Cobalt Mine. These mines are very rare, only four being in operation in Europe, and but one of any consequence in our own country. This is a very rare metal and is principally used in the arts.

But we have other values than cobalt. Gold, cobalt and copper constitute the chief values, with some silver. The following assay will prove this:

Gold, 2.479 oz.	Value, \$ 51.24
Cobalt, 6.75 per cent.	" 189.00
Copper, 31.1 per cent.	" 42.20
Silver, 8.45 oz.	" 5.07
Total value per ton, \$287.51	

We have the distinction of not only having the only gold-cobalt property in the Sumpter district, but also the largest mining property in Eastern Oregon. Twenty-six claims are included in our holdings, being the consolidation of three large mines.

Our development work is represented by 3500 feet, and gives us at least One-half Million Dollars Worth of Ore in Sight. A vigorous policy of development has been entered upon which will create a great ore reserve.

The plan in relation to the further equipment of the property is to install a concentrator of large tonnage capacity and make our mines permanent producers at an early date.

We have some stock that we can offer you at this time for

10 CTS. PER SHARE

This is certainly a very low price for such an excellent investment. If you have never seen any of this gold-cobalt, write us, mentioning THE SUMPTER MINER, and we will be pleased to send you a specimen.

We have said but little concerning our property and hope you will be free to write us for full particulars.
