**THE GOLD BUG GRIZZLY**

**Manager Hennessey Starts  
Operations There Today.**

J. J. Hennessey, general manager of the Gold Bug Grizzley, started a force of men at work today on the property in accordance with the advice wired a few days ago by the eastern management.

The immediate development outlined by Manager Hennessey will be to resume work on the shaft which is now down 100 feet, and sink to the 300 foot level, cutting stations at the 100's, crosscutting to the parallel ledges and drifting both ways on them. The shaft is between these two veins which are about seventy feet apart.

The property is well equipped with hoisting machinery, consisting of a hoist good for 700 feet, a twenty-six horse power engine, a fifty horse power return tubular boiler

and a No. 7, 110 gallon pump. The instructions from the east are to push development work with all possible speed.

**TALK OF THE TOWN**

Mrs. W. H. Godfrey is the guest of Mrs. Thomas McEwen this week.

Seymour H. Bell left this afternoon for Tacoma, on a flying business trip.

Neil J. Sorensen started to Portland today, expecting to be gone a week.

O. Mangold, of the Mason Erhan Grocery company of Portland, was in the city last week.

O. C. Wright, of Van Vleet & Wright, returned this week from a business trip to the John Day valley.

E. T. Parker, of Baker City, has taken a place with the Geiser-Hendryx Investment company as book-keeper.

J. W. Burks, of Burks & Snyder, mining brokers, left last week for

Portland on a business trip to be gone some time.

Mr. and Mrs. W. Swackhammer, Miss E. Barker and Mr. Roy H. Clark spent last Sunday at the North Pole and Midway.

James A. Howard, general manager of the Golconda, accompanied by Mrs. Howard, left yesterday for a short visit to Pendleton.

Dr. Fisher, formerly a resident of Sumpter, now living in Portland, reached here yesterday to look after his various mining interests in the district.

O. A. La Crone, of Kalamazoo, Michian, president of the Northwestern Mining and Lumber company, operating the Tammany group of claims, is expected here in a few days.

(MENTION THE MINER)

**SWORN EVIDENCE**

**I**T IS always a little perplexing for a Fiscal Agent to present a mining proposition so that those who read his literature will know that he is presenting the plain, unvarnished FACTS. This is not necessarily the fault of the agent nor the mine that he represents. Often agents who are at a distance from the scene of operation, and not being experienced mining men, get wrong impressions about any mine that they are financing.

We desire to state that we are practical mining men, are right here on the ground, and have watched the progress of development of the GOLD BUG MINE from the time that the first "location work" was done. Therefore we are in position to know all the facts about this mine.

Notice the following: We have opened out one of the prettiest and richest SHOTS OF ORE that one could wish to see. For over 200 feet there is not a break in the ore nor a blank in the values in the ore. We began the drift in rich ore and the face of the drift shows the best or encountered. This ore shoot opens up on the surface for over 600 feet, and we have demonstrated that the vein widens and the values grow richer with depth. The values in this FREE MILLING ORE run from \$30 to \$1,700 per ton in GOLD. Many samples run up into the thousands, and much of the ore shows free gold to the naked eye. But this ore shoot is only a small part of the GOLD BUG MINE. The management is composed of experienced mining men who have made a success of their other mines, and the circumstances were not as favorable as they are at this time.

To any one who desires to visit this mine we make the following offer:

If, after you have thoroughly inspected it, you are not able to duplicate the values as stated or find any misrepresentations whatever about this mine, we will pay all expenses of the trip. Pool your interests and send a representative, for we mean exactly what we say. We want you to see this mine. We want you to see what has been done and what is being done. We want you to see and handle the ore and see the gold in it with your own eyes. We insist on your investigating this proposition, because, if you do not, it is not fair to us, to the mine or to yourself. If this mine is just as represented you will know that we are offering you an exceptional investment. If it is not, we will take the blame and you are out nothing for your trouble. We invite visitors because every VISITOR means an INVESTOR. This has been true without exception. We have published several reports from visitors who are now investors. We have agreed to raise a certain amount of money by JULY 1st for the further development and equipment of this mine, and we are going to make our word good. If you can not come and see this mine for yourself you can send for our large, illustrated prospectus and a sample of this rich ore (which you can have tested for your own satisfaction). If you are not then satisfied you can have a block of the stock reserved for a reasonable time until you make further investigations, unless the present allotment is over subscribed in the mean time. There is a very brisk movement in this stock, so take our advice and write or wire TODAY. It will mean a great deal to you no matter whether you are a poor man or a capitalist.

REMEMBER, July first is the limit, unless you have your order reserved. The Directors of the Company have so instructed us.
